RE: Watson Treating Plant
Sec 34, Township 8 South, Range 35 East
NMPM, Lea County New Mexico
Closure Request

The New Mexico Oil Conservation Division has received your request dated February 19, 2004 requesting closure of the above site and release of the bond. After investigation into the circumstances surrounding the site such as prior NMOCD approval for closure and landowner satisfaction regarding the conditions at the site, this request is hereby granted.

You must ask your bank to request release of the bond. When this is received, NMOCD will release the bond being held by NMOCD to ensure proper cleanup and remediation at the site. This approval does not relieve you of future liability should operations at this site prove to have been harmful to public health or the environment. Nor does it relieve you of your responsibility to comply with the rules and regulations of any other governmental entity.

If you have any questions, contact me at (505) 476-3492 or emartin@state.nm.us

February 19, 2004

Mr. David Catanach,

I, Danny R. Watson am the owner of Watson Treating Plant. We did have a treating plant on Sec 34 T 85 range 35 east N.M. and we did operate it until we had to move. The reason for moving the plant was the rancher Mack Ainsworth inherited the ranch from his father and he wanted us out. We tried to pay our way, but he would not talk to us about staying. We cannot prove who shot holes in our tanks several times, but they were done shortly after the rancher told us to get out.

We then applied to move the plant equipment and get permission. Then after we moved we never ever had another hole shot in our tanks. We then cleaned up the grounds around the location. We got the okay for clean up from Jerry Sexton and Eddie Seay from Hobbs OCD. We then contacted the rancher and he too okayed the site at that time.

Now I am sure the rancher won't say anything because he got so over bearing and upset over other things in his life that he died with a massive heart attack about 5 years ago and I am not sure who owns the land now.

Again we did what we needed and what was required by us that time and we feel that if the OCD and ranchers was satisfied at that time, the bond on this plant should be released.

Please let me know if I can help in any way.

Sincerely,

Danny R. Watson

Re: Case No. 13166
Application of the New Mexico Oil Conservation Division through the Environmental Bureau Chief to Revoke the Permit of Watson Treating Plant to Operate an Oil Treatment Plant, and to Release Bond; Lea County, New Mexico.

Dear Mr. Watson;

By letter dated May 5, 2003, the Division notified you that it intended to revoke the permit for the Watson Treating Plant at Section 12, Township 8 South, Range 34 East, NMPM, in Lea County, New Mexico, if it did not receive a request from you to keep the permit. The Division did not receive such a request. Therefore, the Division is proceeding with a permit revocation hearing.

A hearing will be conducted by a Division hearing examiner in Porter Hall, first floor, 1220 South St. Francis Drive, Santa Fe, New Mexico, at 8:15 a.m. on Thursday, October 9, 2003. At that hearing, you will have an opportunity to oppose the revocation of the permit.

If you have any questions, please do not hesitate to call me at (505) 476-3451.

Very truly yours,

Gail MacQuesten
Assistant General Counsel

ec: Martyne Kieling

VIA CERTIFIED MAIL 7001-1904-0004-3929-8362

Re: Oil Treating Plant at Section 12, Township 8 South, Range 34 East, NMPM, Lea County, New Mexico permitted by Order No. R-6095 issued in Case No. 6616, under date of September 10, 1979.

Dear Mr. Watson:

The Oil Conservation Division (OCD) has determined that disposal operations have ceased at the referenced facility. Watson Treating Plant submitted a closure plan that was approved by the OCD on December, 2002. Watson Treating Plant submitted closure reports dated February 3, 2003 and March 20, 2003. The closure of the facility was approved by the OCD on May 2, 2003.

In the absence of a response to this letter, the Division will proceed with an application for a hearing to show cause why the permit for this facility should not be revoked. You posted a surety bond, in the amount of \$10,000, No. BO1148 issued by Underwriters Indemnity Company on January 1, 1987. Upon revocation of the permit this Bond will be released.

Unless the permittee submits to this office, no later than May 23, 2003 a request to keep the permit, the Division will proceed to schedule a permit revocation hearing.

Should you have any questions, please call Martyne Kieling at (505)-476-3488.

Sincerely,

A handwritten signature in black ink, appearing to read "Roger C. Anderson".

Re: CLOSURE OF WATSON TREATING PLANT
Section 12, Township 8 South, Range 34 East, NMPM, Lea County, New Mexico
permitted by Order No. R-6095 issued in Case No. 6616, under date of September
10, 1979.

Dear Mr. Watson:

The New Mexico Oil Conservation Division (OCD) is in receipt of Watson Treating Plant's (Watson) closure report dated March 20, 2003 for the treating plant at the above-referenced location. Based on the closure report with photos and "Proof of Test Holes Report" dated February 3, 2003. The OCD has determined that the treating plant location has been remediated to OCD standards and the site has been restored. **The OCD hereby approves of the closure of Watson Treating Plant.**

Please be advised that OCD approval does not relieve Watson of liability should any remaining contaminants result in pollution of the ground water, surface water or the environment. In addition, OCD approval does not relieve Watson of the responsibility for compliance with other federal, state, or local laws and/or regulations.

If you have any questions please contact me at 505-476-3488.

Sincerely,

Martyne Kieling
Environmental Geologist

**RE: Proof of Test Holes Report
Watson Treating Plant, Inc.
Section 12, Township 8 South, Range 34 East, NMPM
Lea County, New Mexico**

Dear Mr. Watson:

The New Mexico Oil Conservation Division (OCD) received the Watson Treating Plant, Inc. (Watson) "Proof of Test Holes" report on February 3, 2003. The OCD has reviewed the report for Watson along with the closure plan conditions that were outlined in OCD's December 6, 2002 letter. The closure conditions along with comments on each are as follows:

1. Additional wastes may not be disposed of or managed on the property.

Closure condition completed.

2. At least one soil sample from each tank footprint location must be taken (see photo 2). The Soil samples should be taken between three and five feet below ground surface (bgs). If there is any visible contamination at the three to five foot sample depths additional samples must be taken at a minimum of five-foot sample intervals from the original sample point until there is no visible contamination detected. All soil samples taken must be stored on ice and analyzed for total petroleum hydrocarbons (TPH), benzene, toluene, ethyl benzene, and xylene (BTEX), and chloride.

Closure condition completed

Three samples were taken any where from 30 inches to 4 feet below ground surface.

Analytical results are in reported as follows:

BTEX is below detection limits,

TPH is below detection in the North Hole and Center Hole,

TPH is 126 ppm at three (3) feet bgs in the South Hole,

chloride is 128 ppm at 30 inches bgs in the North Hole,

chloride is 288 ppm at four (4) feet bgs in the Center Hole, and

chloride is 64 ppm at three (3) feet bgs in the South Hole.

Ground water has been estimated to be approximately 80 feet bgs. Soil remediation levels as calculated in the NMOCD Surface Impoundment Closure guidelines for this location are as follows:

Benzene	10 ppm
BTEX	50 ppm
TPH	1000 ppm

Based on these numbers and the analytical results in the report cleanup levels have been met for the site.

3. All samples collected for OCD reporting purposes will be analyzed at an approved lab using appropriate EPA Test Methods.

Closure condition completed.

4. Watson must remove any equipment that was associated with the treating plant but not currently used by the water station.

Closure condition pending.

Treater and other equipment is still on site based on three of the photos submitted in the report for the test holes.

5. Watson shall submit a final closure report for review and approval to the OCD Santa Fe office and a copy to the Hobbs District office when the closure is complete. The closure report must include all analytical reports and quality assurance and quality control documentation.

Closure condition pending.

The "Proof of Test Holes" report meets a portion of this closure condition. Watson has supplied all analytical reports and quality assurance and quality control documentation along with photographs. A final report is needed that will document that the treater and equipment has been removed

Please be advised that OCD approval does not relieve Watson of liability should any remaining contaminants result in pollution of the ground water, surface water or the environment. In addition, OCD approval does not relieve Watson of the responsibility for compliance with other federal, state, or local laws and/or regulations.

Please give me a call at (505) 476-3488 if you have any questions.

Sincerely

Martyne J. Kieling
Environmental Geologist

Xc: OCD Hobbs Office
File WM-01-029

C. GROUND WATER QUALITY

If ground water is encountered during the soil/waste characterization of the impacted soils, a sample should be obtained to assess potential impacts on ground water quality.

Ground water samples should be obtained using the sampling procedures in Section III.C. If there is a reasonable probability of ground water contamination based upon the level of contaminants in the soils directly beneath the pit or the extent of soil contamination defined during remedial activities, monitor wells may be required to assess potential impacts on ground water and the extent of ground water contamination.

II. SOIL AND WATER REMEDIATION LEVELS

A. SOILS

1. Highly Contaminated/Saturated Soils

Highly contaminated/saturated soils should be remediated insitu or excavated to the maximum extent practicable and remediated using techniques described in Section IV.A.

2. Unsaturated Contaminated Soils

The general site characteristics obtained during the site assessment (Section I.A.) will be used to determine the appropriate soil remediation levels using a risk based approach. Soils which are contaminated by petroleum constituents will be scored according to the ranking criteria below to determine their relative threat to public health, fresh waters and the environment.

a. Ranking Criteria

	<u>Depth To Ground Water</u>	<u>Ranking Score</u>
	<50 feet	20
≈ 80'	50 - 99	10
	>100	0

Wellhead Protection Area

<1000 feet from a water source, or;
<200 feet from private domestic water source

Yes	20
(No)	(0)

Distance To Surface Water Body

<200 horizontal feet	20
200 - 1000 horizontal feet	10
(>1000 horizontal feet)	(0)

b. Recommended Remediation Level

The total ranking score determines the level of remediation that may be required at any given site. The total ranking score is the sum of all four individual ranking criteria listed in Section II.A.2.a. The table below lists the remediation level that may be required for the appropriate total ranking score.

(NOTE: The OCD retains the right to require remediation to more stringent levels than those proposed below if warranted by site specific conditions (ie. native soil type, location relative to population centers and future use of the site or other appropriate site specific conditions.)

	<u>Total Ranking Score</u>		
	<u>>19</u>	<u>10 - 19</u>	<u>0 - 9</u>
<u>Benzene (ppm) *</u>	10	10	10
<u>BTEX (ppm) *</u>	50	50	50
<u>TPH (ppm) **</u>	100	1000	5000

* A field soil vapor headspace measurement (Section III.B.1) of 100 ppm may be substituted for a laboratory analysis of the Benzene and BTEX concentration limits.

** The contaminant concentration for TPH is the concentration above background levels.

B. GROUND WATER

Contaminated ground water is fresh ground water which contains free phase products, measurable concentrations of dissolved phase volatile organic constituents or other dissolved constituents in excess of the natural background water quality. Ground water contaminated in excess of the New Mexico Water Quality Control Commission (WQCC) ground water standards or natural background water quality will require remediation.

III. SOIL AND WATER SAMPLING PROCEDURES

Below are the sampling procedures for soil and ground water contaminant investigations of unlined surface impoundments that have received RCRA Subtitle C exempt oil field exploration and production wastes. Unlined surface impoundments that have received non-exempt RCRA wastes will be required to be tested to demonstrate that the wastes are not characteristically hazardous according to RCRA regulations.

A. HIGHLY CONTAMINATED OR SATURATED SOILS

The following method is used to determine if soils are highly contaminated or saturated:

1. Physical Observations

Study a representative sample of the soil for observable free petroleum hydrocarbons or immiscible phases and gross staining. The immiscible phase may range from a free hydrocarbon to a sheen on any associated aqueous phase. A soil exhibiting any of these characteristics is considered highly contaminated or saturated.

B. UNSATURATED CONTAMINATED SOILS

The following methods may be used for determining the magnitude of contamination in unsaturated soils:

1. Soil Sampling Procedures for Headspace Analysis

A headspace analysis may be used to determine the total volatile organic vapor concentrations in soils (ie. in lieu of a laboratory analysis for benzene and BTEX but not in lieu of a TPH analysis). Headspace analysis procedures should be conducted according to OCD approved industry standards or other OCD-approved procedures.

Name: Danny R. Watson Title: Owner

Signature:  Date: 10/2/97

5. T.E. Parkingson, Milensand, New Mexico.
6. Done. See Exhibit #11.
7. There are no pits, ponds or open top tanks.
8. If leak was 5 bbls or more, it would be reported to OCC office. If liquid, it would be picked up by vacuum truck and disposed of properly such as put back in good tank. If contaminated, dirt could be remediated on site. That is what I would prefer to do.
9. I do inspect location and tanks every two weeks. Rancher checks daily and does call if I have any problems.
10. I would first clean out the tank then remove them. Check soil for contamination which should be very minimum. As you can see, grass and weeds are growing right up to tanks. Would still remediate or disk up ground as needed to pass standards as we now have.
11. OCD Santa Fe has this on record. No wells within one mile (fresh water) and if you find any water, it is about 80' to top of water zone sometimes.
12. Done.
13. Back off until fresh breathing equipment can be provided.
14. Should be included with Rule 711 Report.

RE: Regulatory Notification, New Federal Requirements for Oil Reclamation Facilities

Dear Sir:

This letter is to advise you of a forthcoming federal requirement that may affect operation of your facility.

As you know, only the New Mexico Oil Conservation Division (OCD) currently regulates your facility. However, on September 25, 1990, a US Environmental Protection Agency (EPA) regulation directing use of the Toxicity Characteristic Leaching Procedure (TCLP) and adding toxicity constituent regulatory levels becomes effective. On that date waste material containing benzene, a natural component of crude oil, will be regulated as federal "hazardous waste" if benzene levels exceed the promulgated level of 500 parts per billion (ppb). Certain waste materials are excluded from this regulation including wastes from crude oil and natural gas exploration and production activities. However, liquid and solid wastes and sludges generated by crude oil and tank bottom reclaimers may not be exempted. Permitting under OCD rules does not necessarily mean your facility is EPA exempt.

If the waste stream from treating crude oil and tank bottoms by your facility contains benzene concentrations of greater than 500 ppb and if that waste is not exempted under EPA interpretation of the oil and gas exclusion, EPA will require that the waste stream be permitted and handled as hazardous waste. Additionally, if any portion of a common facility handling exempt exploration and production wastes is also considered to be treating, storing, or disposing of hazardous waste, then the entire common facility may be subject to EPA regulations which include provisions for substantial hydrogeologic investigations, corrective actions, and post-closure monitoring. There are civil and criminal penalties for failure to comply with "hazardous waste" regulations.

Watson Treating Plant, ...

September 19, 1990

Page -2-

Therefore the OCD strongly recommends that you contact and review your operations with a private consultant or attorney familiar with this new federal rule prior to September 25 to determine the impact of the new regulation at your facility, and for advice as to technical permitting requirements and your potential liability.

Currently, the State of New Mexico is taking action to notify President Bush, the USEPA, and the Department of Energy of the impact of this new rule, and is requesting implementation be delayed for at least six months while the issue is reexamined. However, the outcome of this appeal is far from certain. Enclosed with this letter is a copy of the letter to President Bush. You may also wish to contact members of the New Mexico Congressional delegation regarding this important matter.

If you have any questions you are urged to contact either myself at (505) 827-5812 or Roger Anderson of this office at 827-5884.

Sincerely,

David G. Boyer, Hydrogeologist
Environmental Bureau Chief

RE: Relocation of Treating Plant from Sec. 34, T8S, R35E, to
Sec. 12, T8S, R34E, Roosevelt County.

Dear Mr. Watson:

On January 21, the Oil Conservation Division (OCD) received your application to relocate the Watson Treating Plant from Sec. 34, T8S, R35E to Sec. 12 T8S, R34E, Roosevelt County. The following comments and requests for additional information are based on our review of the information provided and the requirements for a treating plant application as outlined in OCD Rule 312. A copy of Rule 312 was previously furnished to you.

(1) Affirmation

Include the following affirmation and signature with the application:

"I hereby certify that I am familiar with the information contained in and submitted with this application and that such information is true, accurate and complete to the best of my knowledge and belief."

(2) Dwellings and water wells including windmills, located within ¼ mile of the site were not specifically indicated on a map. If any are located within ¼ mile of the site boundaries, please show their location.

(3) Will any pits or below-grade tanks be present at the facility?

Mr. Stan Watson
February 3, 1988
Page 2

- (4) Please furnish a description of the containment dikes, including height, length, and width. Will the reservoir formed by the dikes have a capacity one-third larger than the total capacity of all the enclosed tanks?
- (5) Evidence was not furnished that T.E. Parkinson was given written notice of your application.
- (6) A contingency plan addressing procedures to be followed in case of leaks or spills must be filed with this office.
- (7) What measures will be taken to prevent unauthorized access to the facility? Will gates be closed and locked when authorized personnel are not present?
- (8) Please furnish a closure plan and schedule for cleanup and restoration of the old facility site.
- (9) All information concerning the change in location for this treating plant should also be filed with the OCD Hobbs district office.

Submission of the information requested in this letter will allow our review of your application to continue. If you have any questions, please contact me at 827-5884.

Sincerely,

Jami Bailey

Re: Reply to letter dated Feb.3,1988. Relocation of Treating Plant, from Sec. 34, TRS, R35E to Sec.12, T8S,R34E.,Roosevelt County.

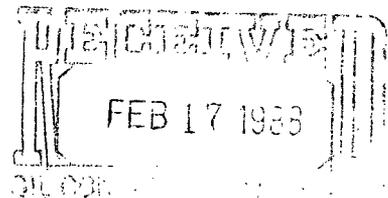

Dear Jami:

- (1) Affirmation complete
- (2) No dwellings or water wells within $\frac{1}{4}$ mile.
Refer to Eddy Seay's letter dated Feb.2,1988.
- (3) There will no pits below ground level.
- (4) Dike description is length 150',width 50',height 3'.
- (5) Letter enclosed from T.E. Parkinson also a copy of certified receipt.
- (6)
 1. Notification to District Office as soon as possible.
 2. Pick up all oil and liquids.
 3. Restore land to industry standard for such leaks.
 4. Notify District office for inspection of leak or spill for approval of clean up.
- (7) Gate going into treating plant will be locked when no personal is on location.
- (8) Tanks will be removed and ground levelled to original contour.
- (9) All information was sent to the Oil Conservation Division, District office Attention: Jerry Sexton.

Sincerely,

A handwritten signature in cursive script that reads "Stan Watson".

Stan Watson
cc:Jerry Sexton

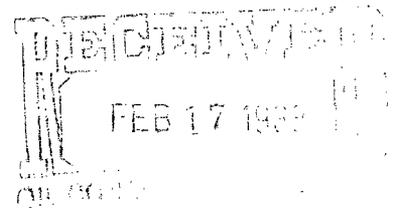

I, T.E. Parkinson am aware of the transfer of the Watson Treating Plant, Inc. from location Sec. 34, TRS, R35E to Sec. 12, T8S, R34E, Roosevelt County.

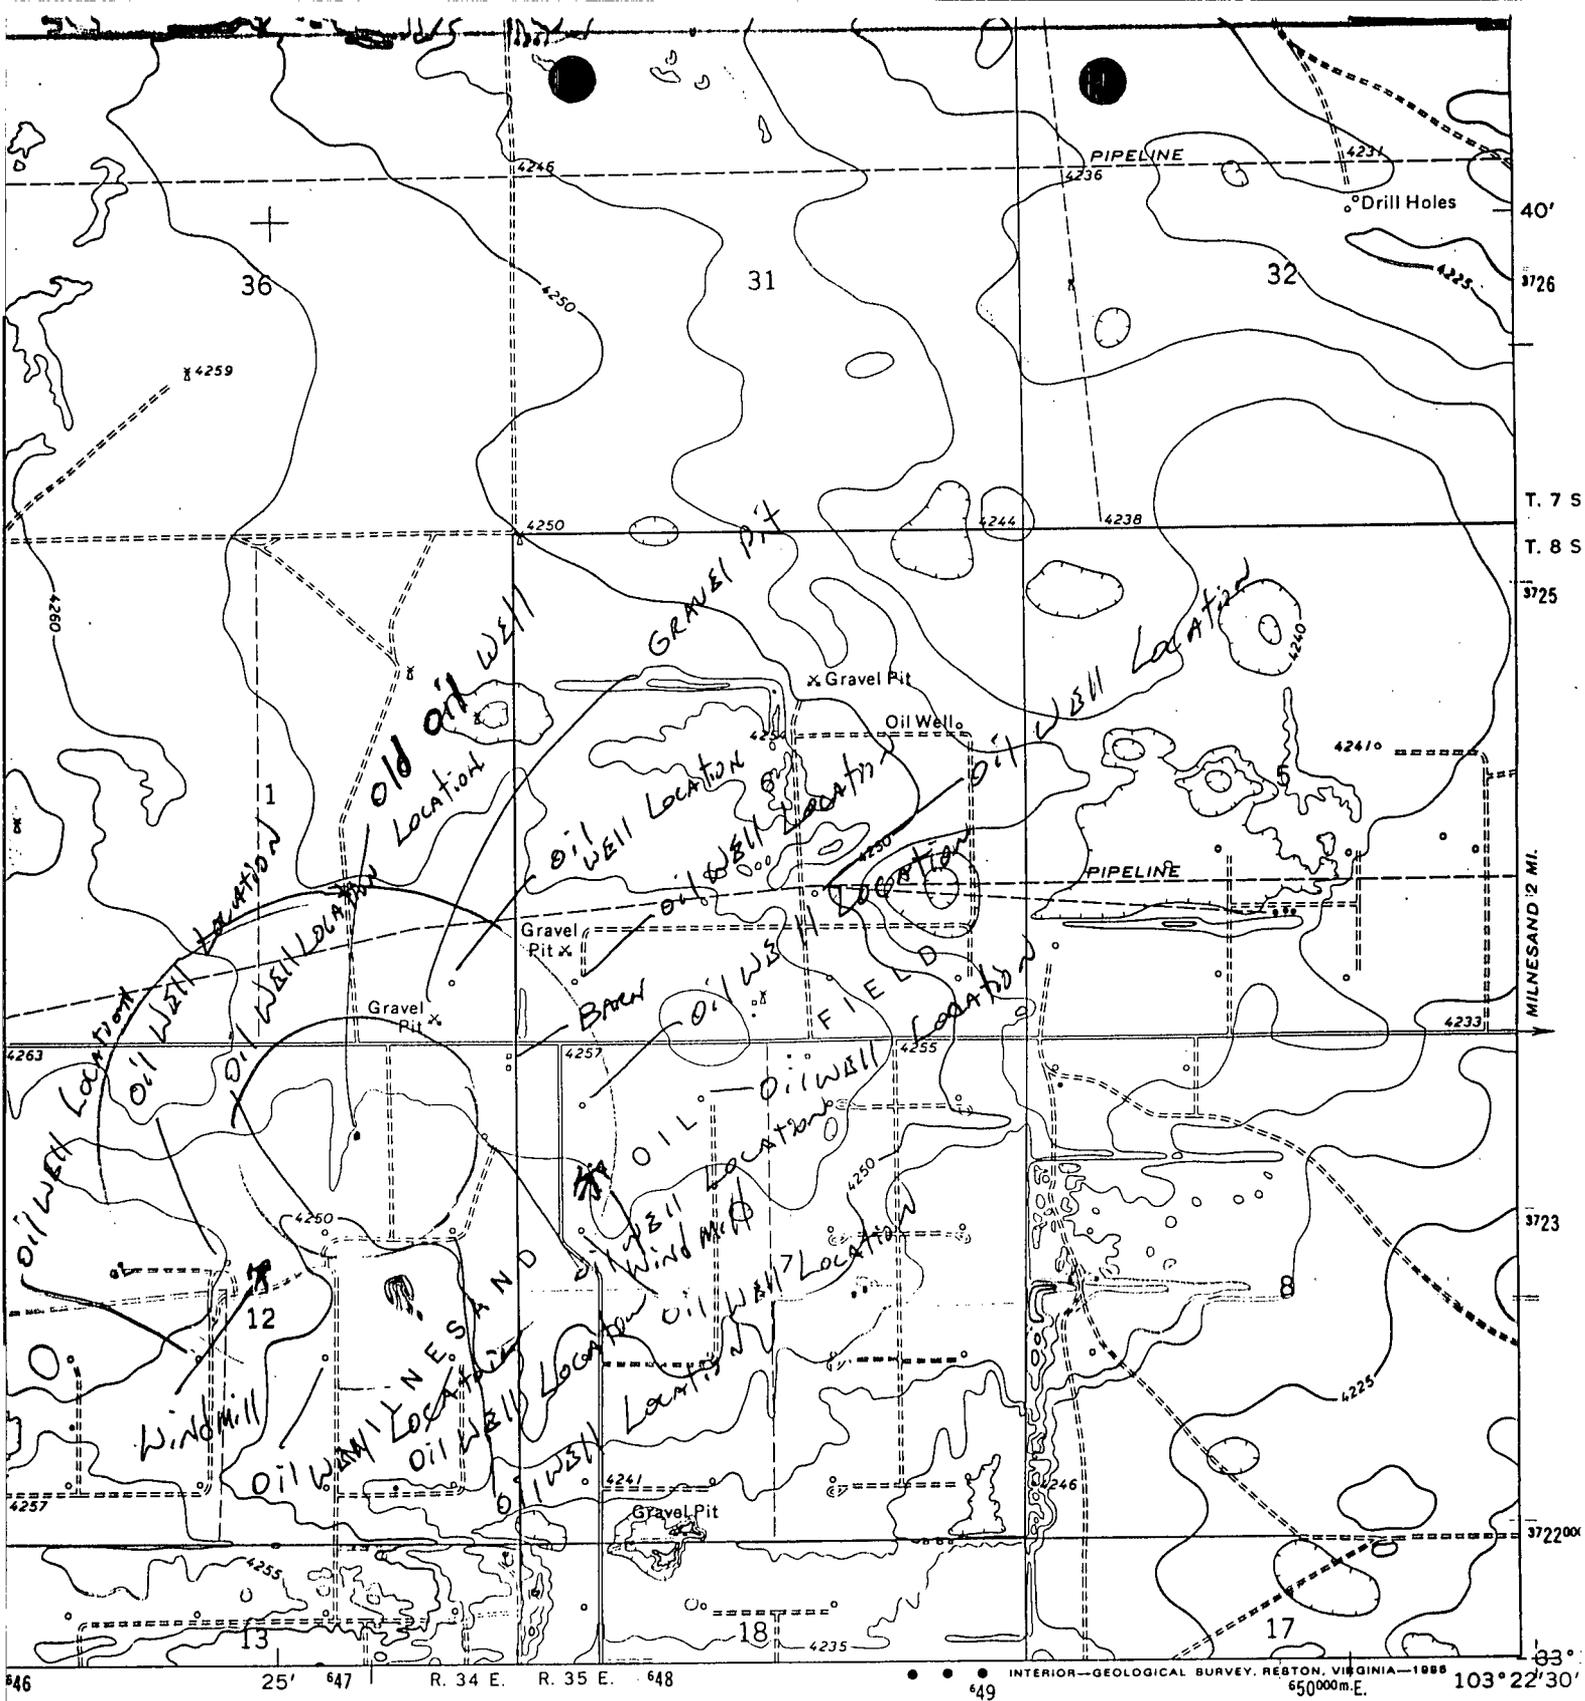

The Watson's have owned and operated the plant at the present site for several years and will own and operate it at the transferred site.

I give my permission for the plant to be in this area.
I see no problem with any hazard what so ever.

T.E. Parkinson

MEMORANDUM TO: Jerry Sexton
 FROM: Eddie W. Seay
 DATE: February 2, 1988
 SUBJECT: Treating Plant

On Thursday, January 21, I inspected a site for Watson Treating plant. The site is located approximately 4 miles west and 1/2 mile south of Milnesand, New Mexico.

The site is an old abandoned battery area, with Breck Operating as the operator of the area. Two water wells were noticed from this site - one to the southwest 3/4 to 1 mile, and one southeast 3/4 to 1 mile. No residence was found in the immediate area. This site seems to be a good location for their new treating plant.

A discharge plan will have to be filed on the environmental aspects of the site to be approved.

RE: Relocation of Treating Plant from Sec. 34, T8S, R35E, to
 Sec. 12, T8S, R34E, Roosevelt County.

Dear Mr. Watson:

On January 21, the Oil Conservation Division (OCD) received your application to relocate the Watson Treating Plant from Sec. 34, T8S, R35E to Sec. 12 T8S, R34E, Roosevelt County. The following comments and requests for additional information are based on our review of the information provided and the requirements for a treating plant application as outlined in OCD Rule 312. A copy of Rule 312 was previously furnished to you.

(1) Affirmation

Include the following affirmation and signature with the application:

"I hereby certify that I am familiar with the information contained in and submitted with this application and that such information is true, accurate and complete to the best of my knowledge and belief."

_____ (Signature)	_____ (Date)
_____ (Printed Name of Person Signing)	_____ (Title)

(2) Dwellings and water wells including windmills, located within ¼ mile of the site were not specifically indicated on a map. If any are located within ¼ mile of the site boundaries, please show their location.

(3) Will any pits or below-grade tanks be present at the facility?

- (4) Please furnish a description of the containment dikes, including height, length, and width. Will the reservoir formed by the dikes have a capacity one-third larger than the total capacity of all the enclosed tanks?
- (5) Evidence was not furnished that T.E. Parkinson was given written notice of your application.
- (6) A contingency plan addressing procedures to be followed in case of leaks or spills must be filed with this office.
- (7) What measures will be taken to prevent unauthorized access to the facility? Will gates be closed and locked when authorized personnel are not present?
- (8) Please furnish a closure plan and schedule for cleanup and restoration of the old facility site.
- (9) All information concerning the change in location for this treating plant should also be filed with the OCD Hobbs district office.

Submission of the information requested in this letter will allow our review of your application to continue. If you have any questions, please contact me at 827-5884.

NOTICE OF PUBLICATION(FOR)
STATE OF NEW MEXICO
ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTEMNT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to Oil Conservation Division regulations, the following treating plant application has been submitted for approval to Director of the Oil Conservation Division:

State Land Office Building
P.O. Box 2088
Santa Fe, NM 87504-2088
(505)827-5800

Watson Treating Plant proposes to move from Sec. 34, T8, R35E, Roosevelt County to Sec. 12, T8, R34.

A design capacity of 2500 barrals.

Surface facility only. No fluid injection nor fluid extraction.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. Prior to ruling on any proposed treating plant or its modification, the Director shall allow at least 20 days after the date of publication of this notice during which time comments may be submitted to him and a public hearing may be requested by any interested person. Requests for a public hearing should set forth reasons why a hearing should be held. A public hearing will be held if the OCD Director determines there is sufficient public interest.

If no public hearing is held, the Director will approve or disapprove the application based on information available. If a public hearing is held, the Director will approve or disapprove the application based on information in the plan and information submitted at the hearing.

The plat and maps within this transfer request, illustrate our newly proposed site. Watson's will remain the owner/operator of the plant, and only want to relocate for distance and feasibility reasons.

The treating plant process of tank bottoms and unsalable crude oil will be carried on with our propane heater. The additional tanks will be used for sorting oil rather than capacity storage.

The unmerchable fluids will be reported and taken to Parabo, Inc. at Eunice, NM.

Thank you,

Stan Watson

P. O. Box 2088
Santa Fe, New Mexico 87504-2088

Dear Sir:

Watson Treating Plant is seeking authority to transfer their plant from Sec 34, T8S, R35E, in Roosevelt County to S.2 SE4, Sec 5, T14S, R36E in Lea County.

We, the undersigned, being land owners and home owners within a two mile radius of the proposed site, respectfully ask that the transfer be denied. The odor from the plant will be overpowering, our water supply could become contaminated and it is our belief that the value of our land will be reduced.

OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to Oil Conservation Division regulations, the following treating plant application has been submitted for approval to Director of the Oil Conservation Division:

State Land Office Building, P.O. Box 2088, Santa Fe, New Mexico 87504-2088, (505) 827-5800

Watson Treating Plant proposes to move from Sec. 34, 8S, 35E, Roosevelt County to Sec 12, T8, R34.

At a design capacity of 2500 barrels.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. Prior to ruling on any proposed treating plant or its modification, the Director shall allow at least 20 days after the date of publication of this notice, during which time comments may be submitted to him and a public hearing may be requested by any interested person. Requests for a public hearing should set forth reasons why a hearing should be held. A public hearing will be held if the OCD Director determines there is sufficient public interest.

If no public hearing is held, the Director will approve or disapprove the application based on information available. If a public hearing is held, the Director will approve or disapprove the application based on information in the plan and information submitted at the hearing.

Published in the Portales News-Tribune January 18, 1988. Legal #0161.

OIL CONSERVATION DIVISION
SANTA FE

Dear Sirs:

I am very much opposed to the moving of the Watson oil treating plant being transferred from Roosevelt Co to Lea Co.

I am a land owner right next to the place they plan to put it. I own almost all of section 5 and all of section 6.

I understand they are sending in a petition against it so will you file that with the petition

Thank you.

Re: Location Transfer of Treating Plant

Dear Ms. Watson:

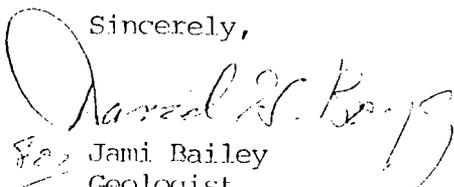

The Oil Conservation Division has received your request for transfer of the Watson treating plant from the SE/4 NW/4 of Section 34, Township 85, Range 35E, Roosevelt County, to the S/2 SE/4 of Section 5, Township 145, Range 36E, Lea County.

In order to approve the transfer, we require that all the information listed in Rule 312 be furnished to this office. This information includes a plat showing the location of the plant, a description of the plant along with a diagrammatic plan of the plant layout, location of water wells, notification of landowners within one half (1/2) mile, etc. A copy of Rule 312 is enclosed for your guidance.

After all the information is submitted and the Division Director gives written approval of the transfer of the location of the treating plant, the \$25,000 bond can be transferred to cover the new location prior to start-up of operation. This transfer of the bond will be approved only upon cleanup and restoration of the Roosevelt County site in accordance with Rule 312.

If you have any questions, feel free to contact me at 827-5884.

Sincerely,

802 Jami Bailey
Geologist

To Whom It May Concern:

Recently the Watson Treating Plant ask for authority of transfer from:

S/½-SE/4 of Sec.5 T14S R 36E

Roosevelt County

To: SE/4 NW/4 Sec 34 T8S R 35E

Lea County

In Rule 312 printed in Oil Conservation Division rules and regulations we have already applied for a treating plant permit and received #R-6095.

We will comply with the rules and regulations of having an approved Form C-104.

We understand the procedures of having approved Form C-117 when cleaning tanks and sediment oil removal.

In the transfer of location S/2-SE/4 of Sec 5 T14S R 36E Roosevelt County will be cleaned to EID specifications.

On the location SE/4 NW/4 S34 T8S R35E Lea County will be st in the matter the Oil Conservation Commission personal in Hobbs ask us to.

Authority of Transfer

WATSON TREATING PLANT, INC.
O.C.C. RECLAIMING PERMIT
R-6095
P.O. BOX 75-(505)398-3490
Tatum, NM 88267

The plat and maps within this transfer request, illustrate our newly proposed site. Watson's will remain the owner/operator of the plant, and only want to relocate for distance and feasibility reasons.

The treating process of tank bottoms and unsalable crude oil will be carried on with our propane heater. The additional tanks will be used for sorting oil rather than capacity storage.

The unmerchantable fluids will be reported and taken to Parabo, Inc. at Eunice, NM.

Thank you,
