Re: BLM (I&W) Site

Subject: Witness sampling event.

Bryan Arret and I met BLM's consultant GES (Frank LeForce) at site which is in Loco Hills NM located on the southeast end of town. BLM property is located just south and next to the OLD I&W treating plant. It appears the treating plant waste bottoms and other trucking waste was disposed of and dumped on the BLM property. The BLM considered this a trespass and has some funds to remove the surface waste. They have submitted a C-138 and we required a TCLP.

Bryan and I visited with Mike Butts manager for I&W and he indicated he has been there 10 years and to his knowledge no one from I&W has used the facility. He did admit that the old treating plant is owned by them and they own the property.

Took Pictures.
