Unit F/6, Section 3, T 21 S. R 37 E.
June 13, 2003
OCD Staff, Chris Williams, Martyne Kieling and
Ed Martin

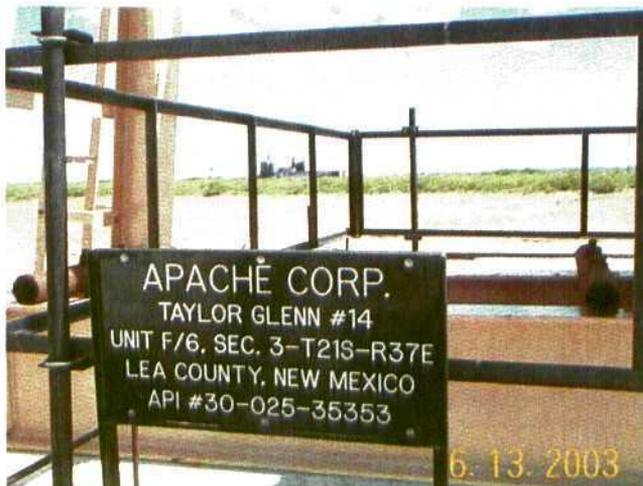

Photo 1. New well in Unit F/6, Section 3, T 21 S. R 37 E. Production pit is shown south of well and the Carbon Black Plant is south of the location by ½ mile. Photo taken looking south.

Photo 3. Some oil contaminated soil on the Taylor Glenn #4 well pad. Photo taken looking south toward the Carbon black plant.

2. Pipe trash near production pit for new well Unit F/6, Section 3, T 21 S. R 37 E. Photo taken looking southeast.

The Unit was walked looking for any evidence of a former treating plant. There was no stained soil or asphalt soils, no former pad areas or areas devoid of vegetation or with stressed vegetation. No trash was found or abandoned equipment. Except for the one piece of pipe next to the new well pad and the stained soil on the new well pad nothing to signify a treating plant location was found.

Re: Oil Treating Plant at Lot 6 of Section 3, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico permitted by Order No. R-5411 issued in Case No. 5883, under date of April 12, 1977.

Ladies and Gentlemen:

The Oil Conservation Division has determined that disposal operations have ceased at the referenced facility, and there has been no significant activity at the facility for a period substantially in excess of six (6) months. Accordingly, pursuant to Rule 711.D [19.15.9.711.D NMAC], the Division has further determined that the referenced facility shall be closed. In the absence of a response to this letter, the Division will proceed with an application for a hearing to show cause why the permit for this facility should not be revoked, the permittee ordered to close the facility in accordance with said Rule 711.D, and the operator's bond forfeited to the extent necessary to defray costs of closing the facility. You posted a surety bond, in the amount of \$10,000, No. 1-925-821-5 issued by Ohio Casualty Insurance Company on May 9, 1977.

Forfeiture may be avoided if the permittee or another party agrees to submit a closure plan and perform closure operations in accordance with Rule 711 and satisfies the Division that such party has the ability to satisfy the conditions required for closure. The surety may assume responsibility for closure of the facility if the surety can demonstrate to the satisfaction of the Division that it has the ability to complete the closure in accordance with a Division-approved plan.

Unless the permittee or surety submits to this office, no later than May 8, 2003 an agreement to submit a closure plan and perform closure operations, the Division will proceed to schedule a permit revocation hearing.

Order R-5411, Case 5883, File 711-047

Dear Mr. Tribbe:

The New Mexico Oil Conservation Division (OCD) has received your letter dated March 13, 2003. In response to your request I have enclosed copies of what the OCD has on file. The OCD has performed inspections in 1997 and 2001. However there are some discrepancies as to the actual location of the Am-Bett Oil Company, Inc. oil treating plant facility. Within the copies you will find a sketch map of the facility as it was in 1979. Am-Bett Oil Company, Inc. never provided a closure plan for OCD review and approval. Thus, the OCD has very little information as to how the facility and the pits were closed.

Enclosed please find a letter that went out to both Am-Bett Oil Company, Inc. and to Ohio Casualty Insurance Company on April 8, 2003.

Sincerely,

Martyne J. Kieling
Environmental Geologist

Re: Case No. 13026 : Application of the New Mexico Oil Conservation Division through the Environmental Bureau Chief to Revoke the Permit of Am-Bett Oil Company, Inc. to Operate an Oil Treatment Plant; Lea County, New Mexico

Ladies and Gentlemen:

You are hereby notified that the New Mexico Oil Conservation Division has filed the referenced Application, a copy of which is enclosed herewith, seeking to rescind the authority of Am-Bett Oil Company, Inc. to operate an oil treatment facility in Lea County, New Mexico, specifically identified in said application.

A hearing on this application will take place before a Division hearing officer on Thursday, March 13, 2002, at 8:15 a.m., in the Division Hearing Room, First Floor, 1220 South St. Francis Drive in Santa Fe, New Mexico. At that hearing you will have an opportunity to show cause why an order should not be entered as requested in the Application.

You posted a surety bond, in the amount of \$10,000, No.1-925-821-5 issued by Ohio Casualty Insurance Company. That security will be forfeited if an order is entered as requested in the attached application and you fail to comply therewith.

Inquiries concerning this application may be directed to the undersigned in the Santa Fe office of the Division at (505)-476-3450.

Very truly yours,

A handwritten signature in cursive script that reads "David K. Brooks". The signature is written in black ink and includes a long horizontal flourish extending to the right.

David K. Brooks
Assistant General Counsel

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

RECEIVED

FEB 18 2003

APPLICATION OF THE NEW MEXICO OIL CONSERVATION DIVISION THROUGH THE ENVIRONMENTAL BUREAU CHIEF TO REVOKE THE PERMIT OF AM-BETT OIL COMPANY, INC. TO OPERATE AN OIL TREATMENT PLANT; LEA COUNTY, NEW MEXICO

CASE NO. 13026

APPLICATION TO REVOKE TREATMENT FACILITY PERMIT
AND FORFEIT BOND

1. By Order No. R-5411, issued in Case No. 5883, The Division granted to Am-Bett Oil Company, Inc. ("Am-Bett") a permit to operate an oil treating plant in the Lot 6 of Section 3, Township 21 South, Range 37 East, in Lea County, New Mexico.

2. Pursuant to the authority of the said order, Am-Bett established an oil treating plant ("the subject facility") in Lot 6 of said Section 3 and commenced operation thereof.

3. More than one year prior to the filing of this application, Am-Bett ceased operating the subject facility and abandoned the same, leaving at the site hydrocarbon and possibly other chemical contaminants that constitute a danger to fresh water, public health and the environment.

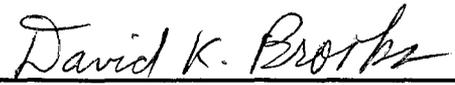

4. Am-Bett has posted a surety bond in the amount of \$10,000 to secure its obligation to properly close the subject facility, in compliance with O.C.D. Rule 711. Ohio Casualty Insurance Company is the surety on said bond, and the number of the bond is 1-925-821-5.

WHEREFORE, the Chief of the Environmental Bureau of the Division hereby applies to the Director to enter an order:

- A. Determining that the subject facility has been abandoned.
- B. Rescinding Order No. R-5411, thereby terminating the authority of Am-Bett to operate the subject facility.
- C. Directing Am-Bett Oil Company, Inc. or its corporate successor(s) to clear and reclaim the subject facility, fully investigate the extent of contamination and, if necessary, remediate the site in accordance with OCD Rule 711.
- D. Further ordering that if Am-Bett or its surety fails to fully investigate the extent of contamination and, if necessary, remediate the subject facility as ordered by the Director, the Division be authorized: (i) to conduct such investigation and remediation in accordance with OCD Rule 711; (ii) to declare forfeit the security furnished by Am-Bett to the extent necessary to fully reimburse the Division for its expenses incurred in accomplishing the foregoing; and (iii) to take necessary and appropriate measures to recover from Am-Bett or its corporate successors any costs incurred in excess of the amount of the bond or other security, if any.

E. For such other and further relief as the Director deems just and proper under the circumstances.

RESPECTFULLY SUBMITTED,

David K. Brooks

Score: 20

Name: Am-Bett Oil Company, Inc.

File: 711-047

Location: 5 miles north of Eunice, NM west side of the carbon black plant. Lot 6 of Section 3, Township 21 South, Range 37 East, NMPM, Lea County, New Mexico. The Correct location is believed to be Unit N or the SE/4 SW/4 Section 3, Township 21 South, Range 37 East, NMPM.

Status: Am-Bett Oil Company, Inc. was permitted by order R-5411 on April 12, 1977. The last owners of record were Clifford R Strasner and Cecil R Strasner.

There is no bond on file for Am-Bett Oil Company, Inc.

Ground water is approximately 25 feet below ground surface. There are at least two possibly three pits that have been filled in. Petroleum contaminated soil is evident along with a buried pipeline with exposed valve. Drums and other assorted trash have been dumped into the pits.

Plan: The next step is to notify the owners that an investigation and cleanup is required for the facility. If that route dead ends the order must be revoked by the Division so that the OCD can perform the investigation and cleanup. The scope of work would include investigation and cleanup to remove the pit contents, remove surface contamination and to investigate the groundwater below the site.

**RE: FACILITY CLOSURE
AM-BETT TREATING PLANT
LEA COUNTY, NEW MEXICO**

Dear Mr. Strasner:

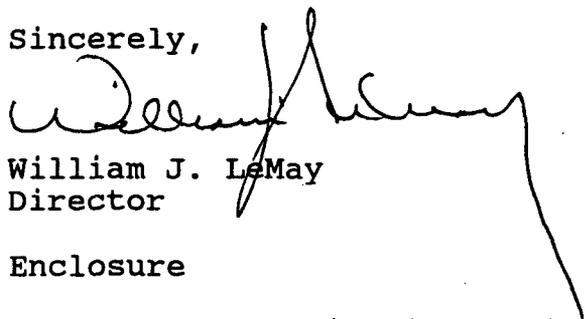

The New Mexico Oil Conservation Division (OCD) has received your July 24, 1993 letter informing the OCD that Am-Bett Oil has removed all surface equipment at the Am-Bett Treating plant and has attempted to backfill an existing unlined pit as part of the facility site closure.

On May 25, 1993, the OCD notified Am-Bett by letter that under OCD rule 312.A.13 a closure plan for this facility must be submitted to the OCD Division Director for approval. The closure plan must be approved prior to performance of the actual work. The closure activities listed in the above referenced letter have not been approved by the OCD. The OCD directs Am-Bett Oil to cease all closure actions at the facility and to provide a closure plan to OCD for approval as required in OCD's May 25, 1993 correspondence.

To help you in preparing your closure plan, enclosed you will find the OCD's "UNLINED SURFACE IMPOUNDMENT CLOSURE GUIDELINES" which provides guidance for the closure of unlined pits.

If you have any questions, please contact Roger Anderson at (505) 827-5812.

Sincerely,

William J. LeMay
Director

P.O. Box 1589
Hobbs, New Mexico 88240

**RE: Am-Bett Treating Plant
Lea County, New Mexico**

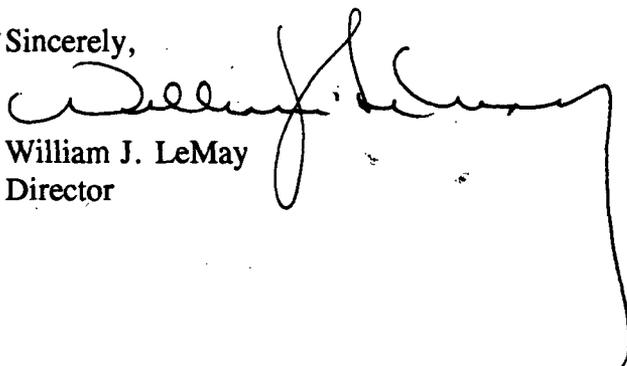

Dear Mr. Strosner,

New Mexico Oil Conservation Division (OCD) records indicate that the Am-Bett Treating Plant, located in lot 6 of Section 3, Township 21, Range 37 East, NMPM, Lea County, New Mexico, has been inactive in excess of six (6) consecutive months.

Pursuant to OCD rule 312.A.13. you are required to submit closure plans detailing how you plan to clean up and restore the facility site. Closure shall be in accordance with a plan acceptable to the Division Director and may include removal or demolition of buildings, removal of all tanks, vessels, equipment or hardware, containment and removal of fluids and chemicals, removal of contaminated soils, backfilling and grading of pits, and reclamation of the general plant site facility. The closure plan must be submitted no later than July 25, 1993.

Prior to release of the bond covering the plant, a representative of the Division will inspect the site to determine if restoration is adequate.

Sincerely,

William J. LeMay
Director

RE: Regulatory Notification, New Federal Requirements for Oil Reclamation Facilities

Dear Sir:

This letter is to advise you of a forthcoming federal requirement that may affect operation of your facility.

As you know, only the New Mexico Oil Conservation Division (OCD) currently regulates your facility. However, on September 25, 1990, a US Environmental Protection Agency (EPA) regulation directing use of the Toxicity Characteristic Leaching Procedure (TCLP) and adding toxicity constituent regulatory levels becomes effective. On that date waste material containing benzene, a natural component of crude oil, will be regulated as federal "hazardous waste" if benzene levels exceed the promulgated level of 500 parts per billion (ppb). Certain waste materials are excluded from this regulation including wastes from crude oil and natural gas exploration and production activities. However, liquid and solid wastes and sludges generated by crude oil and tank bottom reclaimers may not be exempted. Permitting under OCD rules does not necessarily mean your facility is EPA exempt.

If the waste stream from treating crude oil and tank bottoms by your facility contains benzene concentrations of greater than 500 ppb and if that waste is not exempted under EPA interpretation of the oil and gas exclusion, EPA will require that the waste stream be permitted and handled as hazardous waste. Additionally, if any portion of a common facility handling exempt exploration and production wastes is also considered to be treating, storing, or disposing of hazardous waste, then the entire common facility may be subject to EPA regulations which include provisions for substantial hydrogeologic investigations, corrective actions, and post-closure monitoring. There are civil and criminal penalties for failure to comply with "hazardous waste" regulations.

AM-Bett Oil Company, Inc.

September 19, 1990

Page -2-

Therefore the OCD strongly recommends that you contact and review your operations with a private consultant or attorney familiar with this new federal rule prior to September 25 to determine the impact of the new regulation at your facility, and for advice as to technical permitting requirements and your potential liability.

Currently, the State of New Mexico is taking action to notify President Bush, the USEPA, and the Department of Energy of the impact of this new rule, and is requesting implementation be delayed for at least six months while the issue is reexamined. However, the outcome of this appeal is far from certain. Enclosed with this letter is a copy of the letter to President Bush. You may also wish to contact members of the New Mexico Congressional delegation regarding this important matter.

If you have any questions you are urged to contact either myself at (505) 827-5812 or Roger Anderson of this office at 827-5884.

Sincerely,

David G. Boyer, Hydrogeologist
Environmental Bureau Chief

Hobbs, New Mexico 88240

Gentlemen:

On January 15, 1988 I wrote you requesting that you obtain a \$25,000 Treating Plant Bond to replace the \$10,000 bond on file in this office.

To date a replacement bond has not been received in this office. Since it has been nearly six months since we requested this new bond, if we have not received this bond by July 15, 1988, we will be forced to set this for the next available examiner hearing in order that your treating plant permit may be cancelled.

Your immediate attention to this matter will be greatly appreciated.

Sincerely,

A handwritten signature in cursive script that reads "Diane Richardson".

Re: \$10,000 Treating Plant Bond
Bond No. 1-925-821-5

Gentlemen:

In checking our records, I note that you have a \$10,000 Treating Plant Bond on file in this office. I am enclosing a copy of our Order No. R-8284 which states that all treating plant bonds must be replaced with \$25,000 bonds by January 1, 1988. To date, we have not received your replacement bond.

Since this is a violation of the Oil Conservation Division Rules and Regulations, we would appreciate your taking care of this matter immediately. Please advise me no later than January 28th as to when I may expect to receive your replacement bond.

Thank you.

Sincerely,

DIANA RICHARDSON

Mr. Jerry Sexton,

This is notification that Am-Bett Oil Company is currently in the process of reactivating the necessary bond with Ohio Casualty Corporation which was the previous bonding company. We have been assured by Mr. Carroll Leavell, Leavell Insurance Agency, Jal, New Mexico that it will be approximately a week for processing.

Your understanding is appreciated.

Sincerely,
Cliff Strasner

RE: Bond #1-925-821-5 - \$10,000 Treating Plant Bond
Am-Bett Oil Co., Inc.

Dear Ms. Richardson:

On May 8th, 1981 you sent me a letter notifying me that you had received my notice of cancelation for the above bond. At that time you also notified me that your Hobbs district office could not check the location due to heavy rains in the area. I would appreciate it very much if you notify me wheather or not they have had a chance to check the location, and release this bond.

Thank you for your assistance, and I will Look forward to your reply.
