Re: **Hydrostatic Test Water Discharge
Los Alamos County, New Mexico**

Dear Mr. Ferraiuolo:

The Oil Conservation Division (OCD) has received your request, dated October 5, 1994, for authorization to discharge approximately 33,665 gallons of waste water from the hydrostatic testing of a six (6) mile section of new pipeline (12" line) located near Los Alamos, New Mexico.

Based on the information provided in your request, the hydrostatic test water discharge is hereby approved subject to the following conditions:

1. The test water will be discharged into a manhole of the United States Department of Energy's Los Alamos National Laboratory sanitary sewer system along the west side of Bikini Road south from West Jemez Road, Los Alamos County, New Mexico.
2. The pipe must be new and never previously used for oil and/or gas transmission.
3. The test water will be potable water obtained from a fire hydrant located along East Jemez Road.

Pursuant to WQCC Regulation 3-106.B, this approval will allow you to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal reapplication must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Mr. Ferraiuolo

Issue
October 5, 1994 request for authorization to discharge hydrotest water from testing of 6 mile section of Line-A located in or near Los Alamos.

Discussion

Jon wanted to know what the status of thier request to discharge from the testing of 6 miles of 12" pipe. PSCNM will use fresh water on the new pipe and discharge into the municipal sewer system.

Discharge is scheduled to begin Thursday October 27th.

Conclusions or Agreements

Verbal approval given and conditions conform to previous "new pipe/fresh water" approvals and to what was proposed

Signature

Signed

Re: **Hydrostatic Test Water Discharge**
Los Alamos County, New Mexico

Dear Mr. Ferraiuolo:

The Oil Conservation Division (OCD) has received your request, dated September 8, 1994, for authorization to discharge approximately 159,146 gallons of waste water from the hydrostatic testing of a six (6) mile section of new pipeline (12" line) located near Los Alamos, New Mexico.

Based on the information provided in your request, the hydrostatic test water discharge is hereby approved subject to the following conditions:

1. The test water will be discharged into a manhole of the United States Department of Energy's Los Alamos National Laboratory sanitary sewer system along the south side of East Jemez Road, Los Alamos County, New Mexico.
2. The pipe must be new and never previously used for oil and/or gas transmission.

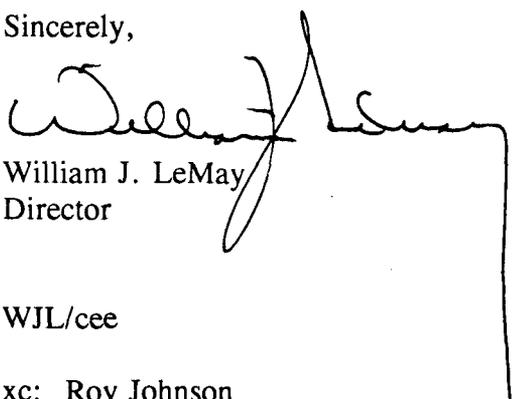

Pursuant to WQCC Regulation 3-106.B, this approval will allow you to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal reapplication must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Mr. Ferraiuolo
