Re: **Hydrostatic Test Water Discharge, Jal-4 line**
SE/4 of Section 4, Township 21 South, Range 37 East, NMPM,
Lea County, New Mexico

Dear Mr. Walker:

The New Mexico Oil Conservation Division (OCD) has received Phillips Pipe Line Company's (PPL) request dated April 14, 1999 for authorization to discharge approximately 80,000 gallons of waste water from the hydrostatic testing of 4 inch used pipeline at the above referenced location. In addition the OCD has received supplemental information dated June 7, 1999 that includes water analyses for TCLP Metals, SVOC's and VOC's.

Based on the information provided in the request and supplement the hydrostatic test water discharge is **hereby approved** subject to the following conditions:

1. The test water will be discharged onto private land and landowner permission has been granted.
2. Test water will be released from storage tanks through hay bales to prevent erosion.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.
4. Any solids that accumulate as a result of the discharge will be subject to full hazardous waste characterization testing to determine the proper means of disposal.
5. The analytical results will be made available to the OCD along with a request for disposal of the accumulated solids.

Pursuant to WQCC Regulation 3-106.B, this approval will allow PPL to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more

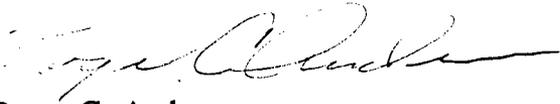

Mr. Anthony C. Walker

than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve PPL of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve PPL of responsibility for compliance with other federal, state or local laws and/or regulations.

If there are any questions, please call Martyne Kieling at (505) 827-7153.

Sincerely,

Roger C. Anderson

**Re: Hydrostatic Test Water Discharge Permit, Maljamar Pipeline
Phillips Pipe Line Company
NE SW Section 25, Township 17 West, Range 29 East, NMPM,
Eddie County, New Mexico**

Dear Mr. Maddox:

The New Mexico Oil Conservation Division (OCD) has received the Phillips Pipe Line Company's (PPL) request dated April 28, 1999 for authorization to discharge approximately 228,060 gallons of waste water from the hydrostatic test of approximately 29.2 miles of 6 inch new pipeline at the above referenced location.

Based on the information provided in the request the hydrostatic test water discharge is **hereby approved subject to the following conditions:**

1. The test water (228,060 gallons) will be discharged to ground along the pipeline right of way through hay bales. The hay bales will be positioned so that any solids present will be trapped, the water is allowed to aerate, and erosion of the existing land surface will be minimized.
2. Only fresh water of less than 2,000 mg/l total dissolved solids from a water supply system or

other potable source shall be used in the hydrostatic test.

3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.
4. Any solids that accumulate at the hay bales as a result of the discharge will be subject to RCRA metals hazardous waste characterization testing to determine the proper means of disposal.
5. The analytical results will be made available to the OCD along with a request for disposal of the accumulated solids.

Pursuant to WQCC Regulation 3-106.B, this approval will allow PPL to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve PPL of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve PPL of responsibility for compliance with other federal, state or local laws and/or regulations.

If there are any questions, please call me at (505) 827-7153.

Sincerely,

Martyne J. Kieling

**Re: Hydrostatic Test Water Discharge Permit, Burch-Keeley Pipeline
Phillips Pipe Line Company
NE NW Section 25, Township 17 West, Range 29 East, NMPM,
Eddie County, New Mexico**

Dear Mr. Maddox:

The New Mexico Oil Conservation Division (OCD) has received the Phillips Pipe Line Company's (PPL) request dated April 28, 1999 for authorization to discharge approximately 13,020 gallons of waste water from the hydrostatic test of approximately 2 miles of 6 5/8 inch new pipeline at the above referenced location.

Based on the information provided in the request the hydrostatic test water discharge is **hereby approved subject to the following conditions:**

1. The test water (13,020 gallons) will be discharged to ground along the pipeline right of way through hay bales. The hay bales will be positioned so that any solids present will be trapped, the water is allowed to aerate, and erosion of the existing land surface will be minimized.
2. Only fresh water of less than 2,000 mg/l total dissolved solids from a water supply system or other potable source shall be used in the hydrostatic test.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.
4. Any solids that accumulate at the hay bales as a result of the discharge will be subject to RCRA metals hazardous waste characterization testing to determine the proper means of disposal.
5. The analytical results will be made available to the OCD along with a request for disposal of the accumulated solids.

Pursuant to WQCC Regulation 3-106.B, this approval will allow PPL to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve PPL of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve PPL of responsibility for compliance with other federal, state or local laws and/or regulations.

**Re: Hydrostatic Test Water Discharge Permit, Mack Energy Pipeline
Phillips Pipe Line Company
SE NE Section 29, Township 17 West, Range 29 East, NMPM,
Eddie County, New Mexico**

Dear Mr. Maddox:

The New Mexico Oil Conservation Division (OCD) has received the Phillips Pipe Line Company's (PPL) request dated April 28, 1999 for authorization to discharge approximately 2,310 gallons of waste water from the hydrostatic test of approximately 0.8 miles of 4 1/2 inch new pipeline at the above referenced location.

Based on the information provided in the request the hydrostatic test water discharge is hereby approved subject to the following conditions:

4. The test water (2,310 gallons) will be discharged to ground along the pipeline right of way through hay bales. The hay bales will be positioned so that any solids present will be trapped, the water is allowed to aerate, and erosion of the existing land surface will be minimized.
2. Only fresh water of less than 2,000 mg/l total dissolved solids from a water supply system or other potable source shall be used in the hydrostatic test.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.
4. Any solids that accumulate at the hay bales as a result of the discharge will be subject to RCRA metals hazardous waste characterization testing to determine the proper means of disposal.
5. The analytical results will be made available to the OCD along with a request for disposal of the accumulated solids.

Pursuant to WQCC Regulation 3-106.B, this approval will allow PPL to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal re-application must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve PPL of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD approval does not relieve PPL of responsibility for compliance with other federal, state or local laws and/or regulations.

If there are any questions, please call me at (505) 827-7153.

Sincerely,
