Subject: Hydro-water

Wayne,
Sid Richardson Gasoline co. has laid a new line from Plant #4 to Plant #3. They plan on filling it with fresh water beginning Feb. 19th. Total line fill is approx 8,000 bls or 336,000 gals.
The starting point of the line is at the Sid Richardson Plant #4 located in Unit Itr. "P" Sect. 31, T-23 S, R-37 E, Lea County N.M.
The point of surface discharge would be at the Sid Richardson Plant #3 located in Unit Itr. "L" Sect. 33, T-24 S, R- 37 E Lea County N.M.
Sid Richardson owns approx 80 acres in Section 31 the remainder of the surface is owned by The Woolworth Estate.
It is anticipated that the water would travel in a west/north west direction when discharged which would probably end up in Section 32 which is owned by the State of New Mexico. Monument draw is located 3.3 miles to the west of Plant #3. The topo map does show a playa 4700 ft to the south-west of Plant #3 in section 32.
Thanks for your help
Tony
