**Re: Hydrostatic Test Water Discharge HI-068-MODIFIED  
Location, Sections 28, 32 & 33 of T 17 S, R 32 E, NMPM,  
Lea County, New Mexico**

Dear Mr. Teacle:

The New Mexico Oil Conservation Division (OCD) has received Conoco Inc's (Conoco) request, dated April 19, 2001, for authorization to discharge approximately 7,442 gallons of waste water from the hydrostatic test of approximately 10,253 feet of used gathering system pipeline (4-inch steel line) located in Sections 28, 32 & 33 of T 17 S, R 32 E, NMPM, Lea County, New Mexico.

Based on the information provided in the request, the hydrostatic test water discharge is hereby approved subject to the following conditions:

1. The test water (7,442 gallons) will be held in tanks and trucked to the Tennessee FED SWD in Sec 22, T19S, R31E to be injected.
2. Only fresh water of less than 1,000 mg/l total dissolved solids from a water supply system or other potable source shall be used in the hydrostatic test.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.

Pursuant to WQCC Regulation 3-106.B, this approval will allow Conoco to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal reapplication must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve Conoco of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD

approval does not relieve Conoco of responsibility for compliance with other federal, state or local regulations.

If there are any questions, please call Martyne Kieling at (505) 476-2488.

Sincerely,

Roger C. Anderson  
Environmental Bureau Chief

**Re: Hydrostatic Test Water Discharge HI-068**  
**Location, Sections 28, 32 & 33 of T 17 S, R 32 E, NMPM,**  
**Lea County, New Mexico**

Dear Mr. Teacle:

The New Mexico Oil Conservation Division (OCD) has received Conoco Inc's (Conoco) request, dated April 19, 2001, for authorization to discharge approximately 7,442 gallons of waste water from the hydrostatic test of approximately 10,253 feet of used pipeline (4-inch steel line) located in Sections 28, 32 & 33 of T 17 S, R 32 E, NMPM, Lea County, New Mexico.

Based on the information provided in the request, the hydrostatic test water discharge is hereby approved subject to the following conditions:

1. The test water (7,442 gallons) will be held in tanks and trucked to the Maljamar Plant to be managed according to Discharge Plan GW-20.
2. Only fresh water of less than 1,000 mg/l total dissolved solids from a water supply system or other potable source shall be used in the hydrostatic test.
3. The fluids will not be allowed to migrate to a water of the State or a water of the U.S.

Pursuant to WQCC Regulation 3-106.B, this approval will allow Conoco to discharge without an approved discharge plan for a period not to exceed 120 days. If the site is to be used for more than one test discharge, formal reapplication must be made. If the discharge exceeds 120 days, a formal discharge plan must be submitted for review.

Please be advised that this approval does not relieve Conoco of liability should their operation result in pollution of surface water, ground water, or the environment. In addition, OCD

Mr. Chuck Teacle  
May 7 2001

approval does not relieve Conoco of responsibility for compliance with other federal, state or local regulations.

If there are any questions, please call Martyne Kieling at (505) 476-2488.

Sincerely,

A handwritten signature in black ink, appearing to read "Roger C. Anderson". The signature is fluid and cursive, with a long horizontal stroke at the end.
