RE: PNM Alameda Natural Gas Pipeline Replacement Temporary discharge filing fee

Dear Mr. Chavez:

Enclosed is a check for \$100. This is the filing fee for the Public Service Company of New Mexico's (PNM) application to temporarily discharge hydrostatic test water for the Alameda Gas Pipeline replacement project. PNM will use municipal water and test on new pipe only. A check for \$150 for temporary permission to discharge was sent to the Oil Conservation Division on June 9th 2006 via registered mail.

Please call me at (505) 241-0665 if you have any questions.

Sincerely,

Marcelle Fiedler
Environmental Scientist II

AFFIDAVIT of PUBLICATION

being first duly sworn, deposes and says: That (he) (she) is the Agent to the Publisher of the Rio Rancho Observer printed and published 2 days a week in the County of Sandoval, State of New Mexico and of general circulation in the City of Rio Rancho, County of Sandoval, State of New Mexico and elsewhere, and the here to attached

STATE OF NEW MEXICO)
:SS
COUNTY OF SANDOVAL)

NOTICE OF PUBLICATION	Individual Permit to hydrostatically test and discharge municipal water for the PNM Alameda Natural Gas Pipeline Replacement Project located south of the intersection of Idalia Rd. & Isabel Rd. SW Rio Rancho (35° 13' 51.58" N 106° 46' 17.57") in Section 13, Township 12 North, Range 2 East, NMPM, Sandoval County, New Mexico. The hydrostatic test involves filling a ~3.5 mile long new 20-inch pipeline with municipal water. Once the test is complete, the water is discharged into a water truck and hauled to a lined pond on PNM property, to be discharged. Ground water is not expected to be affected, since the depth to groundwater ranges from 540 to 760 feet at the discharge location.
STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION	Date of Publication: July 13, 2006
Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations, the following discharge permit renewal has been submitted to the Director of the Oil Conservation Division, 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505. Telephone (505) 476-3440:	
PNM (Public Service Company of New Mexico), Marcelle Fiedler, Environmental Scientist II, Alvarado Square, Albuquerque, New Mexico 87102-2104, has submitted an application for an	

inted and published correctly in the regular and entire issue of The Rio Rancho Observer for 1 issues, that the is made on the 13 day of July 20 06 last publication thereof was made on the day of 20 that said publication

was made on each of the following dates, to wit:

Carl

Attached are my brief comments on your notice of publication. also attached is the one I will put in the newspaper for PNM. I shortened it a bit. does it matter which section of the paper it goes in? also does it have to be a 2x3 ad?

thanks
marcelle

Marcelle:

Please find attached a sample of an oil and gas public notice and affidavit of payment to the newspaper for your consideration in your submittal to the OCD. In addition, I am sharing a draft of the public notice that the OCD may issue as soon as the application is determined to be administratively complete. Please let me know if you have recommended changes to the OCD Public Notice draft and contact me if you have questions. My Supervisor says that we can declare the application administratively complete and continue processing your application while the OCD awaits the \$100 filing fee from PNM.

Consequently, your application has been determined to be administratively complete and I request your review of the OCD Public Notice (see Alameda attachment) for any final changes to the OCD public notice. Thanks.

Carl

- a) see attached map (Figure 1_1)
- b) The test involves filling the new pipe with water from the New Mexico Utilities. Water is pumped into the test section from the low end to the high end to fill the pipe. the water is allowed to stabilize overnight and is then pressurized. Once it has reached the desired pressure it is maintained at that pressure for 8 hours. Once complete the water is discharged into a water truck and hauled to the lined pond on PNM property to be discharged. Water

6/27/2006

hauled in sections to the pond.

c) Contact at New Mexico Utilities is:

Bob Gay

4700 Irving Blvd. Suite 201

Albuquerque, NM 87114

898-2661

d) Point of discharge is (projected) Section 13 Township 12 North, Range 2 East in the Town of Alameda Grant. Street address is: 1601 Espejo Road NW, Rio Rancho NM

e) the pond is 15,300 square feet and is lined (see aerial photo)

f) depth of ground water in the area was obtained from the Office of State Engineers website

<http://www.ose.state.nm.us/water-info/gis-data/index.html>. (see attached map with depth to water at neighboring wells)

g) The water discharged into the lined pond will evaporate

h) PNM is the landowner of the land the lined pond is located on. I can fax the warranty deed if you need it.

Thanks

Marcelle

Subject: PNM Alameda Natural Gas Pipeline Replacement- Request for individual permit to Hydrostatically Test & Discharge

Marcelle:

I have completed my preliminary review of your application for a permit to hydrostatically test and discharge at a specified location. Your application appears to lack the detail necessary for the OCD to review and approve your application.

Oil Conservation Division (OCD) "Guidelines for Hydrostatic Test Dewatering" that may be viewed from the Internet at http://www.emnrd.state.nm.us/emnrd/ocd/documents/7B_hydguid.pdf . I have included the details below for your consideration and to submit to me for consideration of your application.

OCD guidelines for a hydrostatic test of new pipe of more than 100,000 gallons will require a discharge permit approved by the OCD prior to commencement. Items to be included in the permit application include:

- a) Map showing location of the pipelines to be tested (include a topographic map to scale to show drainage features across the area);
- b) Description of the test (general procedures in performing the test);
- c) Source and analysis of test water (the exact source must be documented, i.e., City of Bernalillo w/ contact info., etc.);
- d) Point of discharge of the test water (Township, Range, Section, QQQ/ GIS coordinates/ street address, etc.);
- e) Method and location for collection and retention of fluids and solids (describe the existing pond, dimensions, with gen. lithology- sand, unlined, etc.);
- f) Depth of ground water at discharge and collection/retention site (specific from well record, src. of info. etc.);
- g) Proposed method of disposal of fluids and solids after test completion including closure of any pits (infiltration, evaporation, disposal if applicable (your using municipal water), etc.);
- h) Identification of land owners at and adjacent to the discharge and collection/retention site (documentation of owners of record with details) ;
- i) Written permission from the landowner of the collection/retention site (Is PNM the owner of the property?).

Please address the above so I may review your application. Please contact me if you have questions. Thank you.

From: Chavez, Carl J, EMNRD [mailto:CarlJ.Chavez@state.nm.us]**Sent:** Thursday, June 22, 2006 9:19 AM**To:** Fiedler, Marcelle**Subject:** PNM Alameda Natural Gas Pipeline Replacement- Request for individual permit to Hydrostatically Test & Discharge

Marcelle:

I have completed my preliminary review of your application for a permit to hydrostatically test and discharge at a specified location. Your application appears to lack the detail necessary for the OCD to review and approve your application.

Oil Conservation Division (OCD) "Guidelines for Hydrostatic Test Dewatering" that may be viewed from the Internet at http://www.emnrd.state.nm.us/emnrd/ocd/documents/7B_hydguid.pdf . I have included the details below for your consideration and to submit to me for consideration of your application.

OCD guidelines for a hydrostatic test of new pipe of more than 100,000 gallons will require a discharge permit approved by the OCD prior to commencement. Items to be included in the permit application include:

- a) Map showing location of the pipelines to be tested (include a topographic map to scale to show drainage features across the area);
- b) Description of the test (general procedures in performing the test);
- c) Source and analysis of test water (the exact source must be documented, i.e., City of Bernalillo w/ contact info., etc.);
- d) Point of discharge of the test water (Township, Range, Section, QQQ/ GIS coordinates/ street address, etc.);
- e) Method and location for collection and retention of fluids and solids (describe the existing pond, dimensions, with gen. lithology- sand, unlined, etc.);
- f) Depth of ground water at discharge and collection/retention site (specific from well record, src. of info. etc.);
- g) Proposed method of disposal of fluids and solids after test completion including closure of any pits (infiltration, evaporation, disposal if applicable (your using municipal water), etc.);
- h) Identification of land owners at and adjacent to the discharge and collection/retention site (documentation of owners of record with details) ;
- i) Written permission from the landowner of the collection/retention site (Is PNM the owner of the property?).

Please address the above so I may review your application. Please contact me if you have questions. Thank you.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations, the following discharge permit application(s) has been submitted to the Director of the Oil Conservation Division, 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

Ms L. Kristine Aparicio, Manager Environmental Protection, TEPPCO NGL Pipelines, LLC., 2929 Allen Parkway, 70019 P.O. Box 2521 Houston, Texas 77252-2521, telephone 713-759-3636, has submitted renewal applications for the previously approved discharge plans operated by Duke Energy Field Services for the following facilities:

Gobernador Compressor Station GW-056 located in NW/4 NW/4 of Section 31-Township 30N-Range 7W Rio Arriba County, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 80 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Pump Mesa Compressor Station GW-148 located in SE/4 of Section 14-Township 31N-Range 8W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of greater than 20 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Sims Mesa Compressor Station GW-146 located in NE/4 of Section 22-Township 30N-Range 7W Rio Arriba Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of greater than 14 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Pump Canyon Compressor Station GW-057 located in NW/4 SW/4 of Section 24-Township 30N-Range 9W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 40-120 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Manzanares Compressor Station GW-059 located in SW/4 SE/4 of Section 4-Township 29N-Range 8W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 211 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Hart Canyon Compressor Station GW-058 located in NW/4 SE/4 of Section 20-Township 31N-Range 10W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 130 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Val Verde Treater Gas Processing Plant Station GW-051 located in SE/4 SE/4 of Section 11-Township 29N-Range 11W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 26-55 feet with an estimated total dissolved solids concentration matching that of the San Juan River and Citizens Ditch..

Arch Rock Compressor Station GW-183 located in NW/4 SW/4 of Section 14-Township 31 -Range 10W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 51 feet with an estimated total dissolved solids concentration of 1300 mg/l.

Frances Mesa Compressor Station GW-194 located in SW/4 SW/4 of Section 27-Township 30N-Range 7W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 240 feet with an estimated total dissolved solids concentration of 1700 mg/l.

Sandstone Compressor Station GW-193 located in SE/4 SE/4 of Section 32-Township 31 N-Range 8W San Juan Country, New Mexico. Groundwater most likely to be affected by a spill, leak, or accidental discharge to the surface is at a depth of 80 feet with an estimated total dissolved solids concentration of 1700 mg/l.

The discharge plans addresses how best management practices will be used to properly handle, store, and dispose of oilfield materials and waste. The plan will also have contingencies for preventing and managing releases of accidental discharges of water contaminants to the surface in order to protect fresh water.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division at the address given above. The discharge permit application and draft discharge permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday. The draft discharge permit may also be viewed at OCD's web site <http://www.emnrd.state.nm.us/ocd/>. Prior to ruling on any proposed discharge permit or its modification, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which comments may be submitted and a public hearing may be requested by any interested person. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available. If a public hearing is held, the director will approve or disapprove the proposed permit based on information in the permit and information submitted at the hearing.

GIVEN under the Seal of New Mexico Oil Conservation Commission at Santa Fe, New Mexico, on this 30th day of November 2005.

Subject: RE: 20.6.2.3108 NMAC: WQCC Public Notice & Permitting Flowchart

The engineer would like to move forward with an individual permit. if we do not get it in time we will do the test in sections and work under our blanket permit. I asked about the dimensions of the pipe and it is 20inch OD with a wall thickness of 0.312. that may explain the difference we got in gallons. below is the link I used to get well data. I added it to ArcMap and clicked on the wells in the area. I can make a map of those wells does that suffice?

RE: PNM Alameda Natural Gas Pipeline Replacement
Request for Individual permit to Hydrostatically Test and Discharge

Dear Mr. Martin:

The Public Service Company of New Mexico (PNM) proposes to replace 3.5 miles of 10-inch diameter natural gas pipeline with a 20-inch pipe. The gas pipeline is known as the Alameda Mainline. The pipeline extends from PNM's Santa Fe Junction at the intersection of Isabel and Espejo to a large water tank near Los Sueños subdivision in Bernalillo County (see attached maps). This project will be located on private and state lands in Sandoval and Bernalillo Counties, New Mexico.

Construction of the Alameda Mainline is scheduled to begin on July 5, 2006 and be completed by September 1, 2006. After the installation of the new 20-inch pipe, it will be hydrostatically tested. The test duration will be a minimum of 8 hours and will likely be conducted in mid- to late-August, 2006.

PNM proposes to use approximately 284,000 gallons of water from a municipal water source. The construction contractor will be required to find the water source. PNM proposes to discharge the test water over a 24-hour period in an existing pond located on lands administered by PNM or spread it across the right-of-way at a controlled rate.

According to State Engineer well records, the recorded depth to water near the point of discharge is 440 feet below ground surface.

A check for \$150 is enclosed for an individual hydrostatic test permit. Thank you in advance for your assistance. Please call me at (505) 241-0665 if you have any questions.

Sincerely,

Marcelle Fiedler
Environmental Scientist II
