Re: State Land Salt Water Disposal Easement SW-99

Dear Ms. Bearden:

It is my understanding that Salt Water Disposal Easement SW-99 was officially closed November 15, 2004. Please see the attached notice from Wayne Price, If this information is correct then we owe 500.00 and it is inclosed. The only other thing we would like done is for this acreage to be declared pasture land rather than commercial land. We are not sure where to direct this request. Your help would be appreciated in this matter.

Sincerely,

Patsy Ward

RE: Haseloff/Eidson SWD Case #1R0161
Final Closure

Mr. Price:

Per your request, Haseloff/Eidson has completed final closure operations at their facility. The pvc pipe used for monitoring was cut off below ground and filled with cement. The mound of dirt surrounding the pvc was leveled to ground elevation and area is ready for approval.

We thank you for your help, if anything else is needed, please call.

Sincerely,

Eddie W. Seay, Agent

Subject: RE: Need Input

Yes, Johnny and I have been working on this site. The only thing left is Eddie Seay is going to plug the pit leak detection. As soon as he does that I am going to issue closure. I will copy the State Land Office on our closure. There is some minor surface damage but that will be between the State Land Office and the Lessee. OCD has determined it meets our closure standards for protection of groundwater and the Environment. I have been monitoring this site ever since I was in the district. Eddie Seay has remediated the surface area and it appears it is working. When I was down there the last time I went by and noted there is vegetation beginning to come back. A good sign.

Subject: Release of one wells

Chris, I hear Donna is out sick. I hope all is okay. I wondered cuz normally I hear from her in a couple of days. These people want release of their bonds and need to know if I can release:

Charles W Kemp - OGRID 4259 - 30-025-24053

H & M Disposal - OGRID 9569 - 30-025-3673

Skyline Energy LLC - OGRID 161447 - 30-025-01057

J E Haseloff and Edison Ranch Inc. OGRID 11211 - 30-025-27126

Caprock Exploration wants release of their blanket. Only two wells show up on ONGARD 30-025-30223 but have submitted one-well bond for it and the other is the Saunders 28 B State No. 1 - 30-025-29312 - Caprock claims they only have the one well? Thanks

Dear Mr. Price:

As per your letter dated October 13, 2000, the area has been secured and cleaned up.

The pile of caliche on location was brought in to build pads for tanks and was never used. The caliche was removed and the trash and debris were taken to the Lovington Landfill. The caliche piles and the surrounding area were sampled to check for any contamination. No contamination was found. The analytical data supporting this finding is enclosed.

All plugging reports and logs are on file at OCD office, Hobbs, NM and all sundry reports have been filed.

The pit has been fenced, the berm and liner are intact and in good shape. The leak detection system is dry and the pit has no fluid in it. The pit will continue to be monitored on a regular schedule and any changes that may occur or problems discovered will be reported to the OCD immediately upon discovery.

With the pit being secured and the location free of any contamination, I feel that this facility does not pose a threat to the public health or the environment.

Enclosed are photos and analytical data of this facility. Your consideration in this matter is greatly appreciated.

If you need additional information or have any questions, please call.

Sincerely,

J.E. Haseloff

Dear Mr. Price:

In response to your letter dated July 26, 2000, Eidson Ranch, Inc. will in the near future remove the piles of dirt and clean the location of debris. Additionally, we will continue to monitor the condition at the site. At this time, the seepage detection system remains dry. Please refer to our letter dated May 1, 2000, which reported the condition of the site at that time.

We will continue to notify your office of the status of this site so that it does not pose a threat to public health or the environment.

Sincerely,

J. E. Haseloff

REFERENCE: Salt Water Disposal Closure: SWD-099
Haseloff & Eidson Inc.

SYNOPSIS

Haseloff & Eidson Inc. have requested the cancellation of SWD-099. As reported on MHM-19, during a field inspection on May 12, 1998 the site had not been cleaned up. Numerous other visits have been made to the site since that date to look at the progress of the clean up and during those inspections nothing had been done. NMSLO received a letter dated October 6, 1999 from Mr. J.E. Haseloff again requesting the cancellation of SWD-099. Along with the request was a copy of a letter he had sent to NMOCD regarding the pit closure on SWD-099. The letter stated that he had already spent \$30,000 on trying to close the site and did not have anymore funds available at that time for cleanup. As requested, another field inspection of the lease was conducted on January 20, 2000. During the field inspection it was observed that the fluids had been taken out of the pit area and that the dirt around the pit area had been moved some. The fence that had originally been around the site area has been removed. There is a fence around the old pit area but a portion of it was down at the time of the inspection. There are still mounds of dirt on location along with debris, which needs to be hauled off. Also, there are areas around the lease site, which show signs of saltwater runoff from the lease and are bare of vegetation. I do not recommend the cancellation of this lease at this time as the leasee has not adequately clean up the site.

REFERENCE YOUR TELEPHONE CONVERSATION WITH EDDIE SEAY - CONSULTING - SEPTEMBER 9, 1999 ON BEHALF OF J. E. HASELOFF AND EIDSON RANCH, INC.

AUGUST 13, 1999 WORK BEGAN REMOVING FLUIDS FROM THE STATE APPROVED LINED PIT. SEEPAGE DETECTION SYSTEM DRY. VACUUM TRUCKS TOGETHER WITH STEAM GENERATING TRUCKS WERE USED. THIS WAS A VERY SLOW AND COSTLY PROCESS. AFTER EIGHT DAYS, AND THE REMOVAL OF 2700 BBLs, WORK WAS HALTED DUE TO THE INABILITY TO VACUUM ANY MORE FLUID FROM THE PIT. ALL REMOVED FLUIDS WERE TAKEN TO AN APPROVED OCD DISPOSAL. MATERIAL REMAINING IN PIT WAS MAINLY SEMI-SOLID... TOO THICK TO VACUUM... TOO THIN TO HAUL BY CONVENTIONAL METHODS.

SEVERAL FIRMS WE CALLED IN TO DISCUSS MORE EFFICIENT AND LESS COSTLY MEANS FOR REMOVAL OF THE REMAINING SEMI-SOLIDS. NONE WAS FORTHCOMING. FINALLY IT WAS DECIDED, BECAUSE THE LINER AND DETECTION AS INTACT AND DRY, TO FILL THE PIT WITH AVAILABLE COW MANURE TO A DEPTH OF APPROXIMATELY TWO FEET. OVER TIME, AND WITH THE NATURAL DECOMPOSITION OF THE MANURE AND THE INTEGRATION OF THAT COMPOST INTO THE REMAINING SEMI-SOLID MATERIAL, REMOVAL WILL BE LESS COSTLY, AND POSSIBLY, NOT NECESSARY AT ALL... TIME WILL TELL.

AT THE PRESENT TIME THERE IS NO DANGER TO THE ENVIRONMENT, WILDLIFE, OR MIGRATORY BIRDS. THE PIT AREA IS FENCED, AND THE DETECTION PIPE IS DRY. A FENCED BARRICADE HAS BEEN INSTALLED ACROSS THE ROAD ENTERING THE PIT AREA. HOPEFULLY, THIS WILL CURTAIL UNAUTHORIZED PERSONS FROM ENTERING THE AREA.

Mr. Wayne Price – Environmental Bureau

Reference my letter dated September 24, 1999.

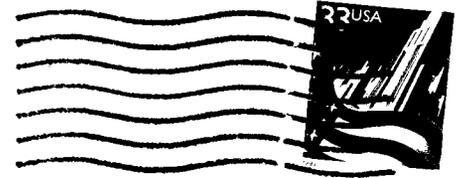

As of January 14, 2000, the seepage detection pipe is dry and there is normal decomposition of the organic material. I am reporting this to you as agreed in the above referenced letter.

Sincerely yours,

J. E. "Pete" Haseloff

Re: Pit Closure Plan
State HO Com SWD-245
Unit Ltr. K, Sec 19-Ts16s-R35e
Lea County, NM

Dear Mr. Haseloff:

New Mexico Oil Conservation Division (NMOCD) recently visited the above referenced site while jointly conducting pit inspections in southeastern New Mexico with the USEPA and Fish & Wildlife Service. The above referenced pit was one of many selected for inspections from recent aerial surveys conducted by the two federal agencies.

After visiting the site and reviewing the OCD file, it appears any pit closure activities have ceased. Therefore you are hereby ordered to close the pit pursuant to the letter issued by NMOCD on December 30, 1997 (copy enclosed). The final closure report deadline is due on or before January 15, 1999.

Failure to respond and meet the Notice deadline may result in a show cause hearing against WI requiring WI to appear and show cause why it should not be ordered to perform the above actions and why WI should not also be assessed civil penalties as allowed by the NM Oil & Gas Act.

If you require any further information or assistance please do not hesitate to call (505-827-7155) or write this office.

Sincerely Yours,

Wayne Price-Environmental Bureau

**RE: Pit Closure Plan
State HO Com
Unit Ltr. K, Sec. 19, T-16-S, R-35-E
Lea County, New Mexico**

Dear Mr. Haseloff:

The New Mexico Oil Conservation Division (OCD) has reviewed the Eddie Seay Consulting Services's December 15, 1997 Pit Closure Plan which was submitted on behalf of Mr. J. E. Haseloff by his agent, Mr. Eddie W. Seay. This document contains Mr Haseloff's plan for closure of a lined pit associated with the State HO Com disposal well.

The above referenced pit closure plan is approved with the following conditions:

1. Prior to OCD issuing final closure approval, a composite floor sample will be taken from the soils underlying the liner.
2. The composite floor soil sample will be analyzed for benzene, toluene, ethylbenzene, xylene, total petroleum hydrocarbons, and chlorides in accordance with the OCD's "Surface Impoundment Closure Guidelines"(attached).
3. The OCD Hobbs District office will be notified 72 hours prior to all closure activities.
4. Mr. Haseloff will submit to the OCD for approval a completed OCD "Pit Remediation and Closure Report" form (attached) which will contain the final results of all pit closure and soil sampling activities including all laboratory or field analytical data sheets for all soil analysis and copies of all associated quality assurance/quality control data. The final pit closure report will be submitted by April 1, 1998.
5. All waste removed from the site will be disposed of at an OCD approved facility.

Mr. J. E. Haseloff
December 30, 1997
Page 2

6. All documents submitted for approval will be submitted to the OCD Santa Fe Offices with copies provided to the OCD Hobbs Office.

To simplify the approval process for both Mr. Haseloff and OCD, the OCD requests that a final pit closure report be submitted only upon completion of all closure activities.

Please be advised that OCD approval does not relieve Mr. J. E. Haseloff of liability should closure activities determine that contamination exists which is beyond the scope of the work plan or if the closure activities fail to adequately investigate or remediate contamination related to the activities at the above referenced pit. In addition, OCD approval does not relieve Mr. J. E. Haseloff of responsibility for compliance with any other federal, state, or local laws or regulations.

If you require any further information please contact me at (505) 827-7155.

Sincerely,

Mark Ashley
Geologist

RE: Closure SWD-245
J. E. Haseloff and Eidson Ranch, Inc.

Dear Mark:

Mr. Haseloff is seeking additional time to try and find the most economic way to properly close the lined pit at his SWD system. He is still in the process of dewatering the pit, once all the water has been extracted, the solids can be more feasibly dealt with.

If you have any questions or suggestions, please call.

Sincerely,

Eddie W. Seay, Agent

Subject: Wasserhaun Pit Closure near Buckeye, NM

Dear Roger and Mark,

After discussing with Chris and since Santa Fe has already begun the closure process we feel it will cloud the issue and slow down the approval process if the District handles. So therefore we are requesting that you following through with the closure. We support your decision criteria in the manner to approve the pit closure. We would recommend that the land owner which I think is NMSLO agrees with closure plan. Also please note this area is over the Ogallala formation. We would also recommend a disclaimer along with approval.

Due to the recent Blow-out our work-load is extremely high and we do not have the time to devote to this project in a timely manner.

We appreciate your help in this matter.

RE: Pit Closure - Wasserhund, Inc.

Dear Mr. Ashley:

As per our conversation concerning the lined pit at Wasserhund, State HC Com P & A Disposal, located in Unit K, Sect. 19, T. 16 S., R. 35 E., Lea County, New Mexico. We would like to on site remediate soils which are in the bottom of the lined pit.

- 1) The area is fenced.
- 2) Berms will be put around the remediation area to prevent runoff and runoff of the site.
- 3) The soils will be spread in 6 in. lifts.
- 4) The site will be disked on a regular basis to allow for aeration, and moisture will be added to prevent blowing and enhance bioremediation.
- 5) We will remediate the site down to whatever level the OCD requests.
- 6) When the fluid level has been reached, the area will be leveled, contoured and seeded.
- 7) Reports will be filed as requested.

If this is allowed, it will make a more economic process for getting rid of the soil and closing the pit.

The groundwater in the area is found at approximately 150 ft. There are no houses or water wells in the near area.

If you have any questions, please call.

Sincerely,

Eddie W. Seay, Agent

ATTENTION: Mark Ashley

SUBJECT: J. E. Haseloff - Pit Closure

Mark Ashley:

It is the desire of Mr. Haseloff to permanently close the pit which was associated with his state HO com. disposal operation in Sect. 19, Tws 16, Rg 35 E., Lea Co., NM.

The pit is lined and has an inspection pipe for monitoring for leaks. The disposal well was plugged and abandoned in early November and the pit is the only thing left on location. Listed is the procedure we would like to use in closing pit:

- 1) Remove bird protection.
- 2) Remove any liquids and solids and take to an approved OCD disposal facility.
- 3) Fold liner in and bury it with the pit area.
- 4) Remove leak detection system.
- 5) Remove any discolored soil, if encountered.
- 6) Mound over to prevent fluid from standing and/or moving across area.
- 7) Send final report to OCD.

If you have any questions or need additional information, please call. Looking forward to hearing from you.

Sincerely,

Eddie W. Seay, Agent
601 W. Illinois
Hobbs, NM 88240
