FINAL ANALYTICAL RESULTS: Sample Date 11/20/2002 Sample Depth 17'

Procure 5-point composite sample of bottom and 4-point composite sample of sidewalls. TPH, BTEX and Chloride laboratory test results completed by using an approved lab and testing procedures pursuant to NMOCD guidelines.

General Description of Remedial Action: A 20' x 20' area was excavated down to 17' bgs. A declination trend of chloride impact was not established so a 1' compacted clay barrier was installed at the 17' bottom. NMOCD guidelines for TPH were met at the 17' bottom composite and the wall composite. The excavated soil was landfarmed on location and then backfilled into the clay-lined excavation.
