Re: Will Cary #005 - Investigation Work Plan  
Site Location: UL-F, Sec 22-T22S-R37E  
Dated: January 7, 2005

Dear Mr. Westbrook,

New Mexico Oil Conservation Division (OCD) received an investigation work plan prepared by Larson & Associates for JHC and referenced above. The plan is **hereby approved** with the following additional requirements:

1. JHC shall propose chloride concentration target levels required before drilling stops and soil borings plugged.
2. JHC shall submit an approved remediation work plan for the E. W. Walden lease by March 1, 2005.

Please be advised that OCD approval of this plan does not relieve JHC of liability should their operations fail to adequately investigate and remediate contaminants that threaten ground water, surface water, human health or the environment. In addition, OCD approval does not relieve JHC of responsibility for compliance with any other federal, state, or local laws and/or regulations.

If you have any questions or need assistance please write or call: (505) 393-6161, ext. 113, or e-mail: [psheeley@state.nm.us](mailto:psheeley@state.nm.us)

Sincerely,

A handwritten signature in cursive script, appearing to read "Paul Sheeley".
