**RE: REMEDIATION PLAN  
HAMPTON 4M WELL SITE**

Dear Mr. Hasely:

The New Mexico Oil Conservation Division (OCD) has reviewed Burlington Resources (BR) April 12, 2000 "HAMPTON 4M – GROUND WATER IMPACT, PROPOSED REMEDIATION PLAN".

This document, which was submitted pursuant to New Mexico Oil Conservation Commission (OCC) Order R-11134-A, contains BR's proposed plan for additional remediation of source areas and monitoring of contaminated ground water related to BR's operations at the Hampton 4M well site.

The remedial action plan as contained in the above referenced document is approved with the following conditions:

1. BR will notify the OCD at least 1 week in advance of scheduled activities such that the OCD has the opportunity to witness the events and/or split samples.
2. BR will include the results of all source remediation actions in the annual report to the OCD.

Pleased be advised that OCD approval does not relieve BR of liability if BR fails to adequately remediate or monitor contamination related to BR's activities. In addition, OCD approval does not relieve BR of responsibility for compliance with any other federal, state, local or tribal laws and regulations.

If you have any questions, please call me at (505) 827-7154.

Sincerely,

A handwritten signature in cursive script, appearing to read "Will Olson".
