RE: 2000 SAN JUAN BASIN ANNUAL GROUNDWATER REPORT

Dear Mr. Pope:

The New Mexico Oil Conservation Division (OCD) has reviewed El Paso Field Services (EPFS) February 26, 2001 "2000 PIT PROJECT ANNUAL GROUNDWATER REPORT". This document contains the results of EPFS's 2000 monitoring and remediation of contaminated ground water related to the closure of unlined oil and gas production pits at 36 sites in the San Juan Basin. The documents also requests closure for 6 of the sites based on the remediation and monitoring actions taken to date.

The OCD's review of the above referenced document is addressed below:

A. Final pit closure approvals for the sites listed below were previously issued by the OCD on April 3, 2001.

- | | | |
|----|------------------------------|-----------------------------|
| 1. | Charlie Pah #2 (Drip pit) | Unit B, Sec. 12, T27N, R09W |
| 2. | K-51 Line Drip (Drip pit) | Unit A, Sec. 34, T26N, R06W |
| 3. | Mesa CPD (Drip pit) | Unit E, Sec. 04, T29N, R14W |
| 4. | Sheets Well #2 (Drip pit) | Unit H, Sec. 28, T31N, R09W |
| 5. | Turner A#1 Pit #1 (Dehy pit) | Unit K, Sec. 34, T31N, R11W |
| 6. | Turner A#1 Pit #2 (Drip pit) | Unit K, Sec. 34, T31N, R11W |

Mr. Scott T. Pope

July 18, 2001

Page 2

- B. The final pit closure and ground water activities at the sites listed below appear satisfactory. However, the reports do not include a completed pit remediation and closure form which contains the results of all soil remediation actions. The OCD cannot issue final closure approval until EPFS submits this information.

- | | | |
|----|---------------------------------|------------------------------|
| 1. | Ohio C Government #3 (Dehy pit) | Unit P, Sec. 26, T28N, R11W |
| 2. | Anderson GC A#1 (CH) (Dehy pit) | Unit C, Sec. 28, T29N, R10W. |

- C. A review of the annual ground water reports for the sites listed below shows that the extent of ground water contamination in excess of WQCC standards at these sites has not been defined or the sites do not contain permanent downgradient ground water monitoring points. The OCD requires that EPFS install additional ground water monitoring wells at these sites to monitor and determine the extent of ground water contamination pursuant to their previously approved ground water investigation plan.

- | | | |
|----|------------------------|-----------------------------|
| 1. | Hammond #41A | Unit O, Sec. 25, T27N, R08W |
| 2. | James F Bell #1E | Unit P, Sec. 10, T30N, R13W |
| 3. | K-27 Line Drip | Unit E, Sec. 04, T25N, R06W |
| 4. | K-31 Line Drip | Unit N, Sec. 16, T25N, R06W |
| 5. | Lateral 0-21 Line Drip | Unit O, Sec. 12, T30N, R09W |
| 6. | Lindrith B#24 | Unit N, Sec. 09, T24N, R03W |

RE: SAN JUAN BASIN ANNUAL GROUNDWATER REPORTS

Dear Mr. Pope:

The New Mexico Oil Conservation Division (OCD) has completed a review of El Paso Field Services (EPFS) December 13, 2000 "MISSING INFORMATION FOR GROUNDWATER SITES REQUESTED FOR CLOSURE IN THE 1999 PIT PROJECT ANNUAL GROUNDWATER REPORT" and March 24, 2000 "1999 PIT PROJECT ANNUAL GROUNDWATER REPORT". These documents contain the results of EPFS's 1999 monitoring and remediation of contaminated ground water related to the closure of unlined oil and gas production pits at 6 sites in the San Juan Basin. The documents also requests closure of the sites based on the remediation and monitoring actions taken to date.

The soil and ground water remediation activities conducted at the sites listed below are satisfactory and the OCD approves of the final closure of these sites on the condition that EPFS plug and abandon all monitor wells by either pulling the casing or cutting the casing below the ground surface and filling the hole or casing annulus with a cement grout containing 3-5% bentonite.

Please be advised that OCD approval does not relieve EPFS of responsibility if remaining contaminants are found to pose a future threat to surface water, ground water, human health or the environment. In addition, OCD approval does not relieve EPFS of responsibility for compliance with any other federal, state or local laws and regulations.

If you have any questions, please call me at (505) 476-3491.

RE: FINAL SAN JUAN BASIN PIT CLOSURE REPORTS

Dear Ms. Miller:

The New Mexico Oil Conservation Division (OCD) has completed a review of El Paso Field Services (EPFS) July 1, 1998 "PIT CLOSURE REPORTS/REQUEST FOR APPROVAL". This document contains the results of the closure of 249 unlined oil and gas production pits in the San Juan Basin.

The OCD's review of the above referenced documents is addressed below:

- A. The pit closure/soil remediation activities conducted at the sites listed on Attachment A are **approved**.

Please be advised that OCD approval does not relieve EPFS of liability if remaining contaminants are found to pose a future threat to surface water, ground water, human health or the environment. In addition, OCD approval does not relieve EPFS of responsibility for compliance with any other federal, state, tribal or local laws and regulations.

- B. The pit remedial activities conducted at the site listed below are satisfactory. However, according to the report, excavated contaminated soils are still located on the site. Subsequently, the OCD cannot issue final closure approval at this time and approval of closure actions at this site is **denied**. Please resubmit a final closure report for this site upon completion of the disposal, landfarming and/or composting activities. The final reports will include the results of the soil remediation levels achieved, the laboratory analyses and associated quality assurance/quality control data and the disposition of the remediated soils.

1. Trunk K Line Drip Pit (Drip pit) Unit I, Sec. 15, T26N, R07W.

Ms. Sandra D. Miller
November 16, 1998
Page 2

C. The final pit remedial contaminant levels at the site listed below are in excess of the OCD's recommended remediation levels and the extent of contamination has not been determined. Consequently, the OCD cannot issue final closure approval and approval of closure actions at this site is **denied**. The OCD requests that EPFS address the extent of the remaining contamination at this site. The OCD will reconsider issuing closure approval upon resubmission of a pit closure form which addresses the remaining extent of contamination at the site. The resubmitted forms should include the completed form and all pertinent information related to the extent of contamination, the results of the soil remediation levels achieved, the results of the soil remediation levels achieved, the laboratory analyses and associated quality assurance/quality control data and the disposition of the remediated soils.

1. Tibbar Fed #2 (Pit #1) (Dehy pit) Unit P, Sec. 13, T26N, R09W.

D. The closure report for the site listed below indicates that ground water was encountered during the Phase II investigations but no ground water sample was obtained to determine if ground water is contaminated in excess of New Mexico Water Quality Control Commission ground water standards. Therefore, approval of this pit closure form is **denied**. The OCD requests that EPFS determine whether ground water at the site is contaminated in excess of New Mexico Water Quality Control Commission ground water standards and, if necessary, remediate contaminated ground water pursuant to EPFS's prior approved ground water investigation/remediation work plan.

1. Charley Pah #2 (Drip pit) Unit B, Sec. 12, T27N, R09W.

If you have any questions, please call me at (505) 827-7154.

Sincerely,

William C. Olson
