July 1996

August 20, 1996

Mr. Bill Olson
New Mexico Oil Conservation Division
2040 South Pacheco Street
Santa Fe, New Mexico 87505

RECEIVED

AUG 20 1996

Environmental Bureau
Oil Conservation Division

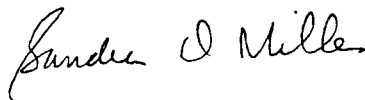

RE: Production Pit Closure Submittal

Dear Mr. Olson:

Enclosed herein are data packages for work completed at El Paso Field Services (EPFS) production pit locations where shallow groundwater was encountered during closure operations. The data included within indicate that these sites merit closure per the New Mexico Oil Conservation Division's (NMOCD) Vulnerable Area Orders and EPFS's closure plan submitted to the NMOCD. In front of each data package is a site specific checklist that indicates the work completed at each location. Each checklist is followed by a short summary of the activities and results of data collected to support closure.

Sincerely,

El Paso Field Services

Sandra Miller
Senior Environmental Manager

Environmental Services Group
Southern Region

Gallegos Canyon Unit #188E
Meter Code - 93296

Pit was excavated to 4 feet beneath ground surface where groundwater was encountered. Headspace soil readings from pit bottom were 89 parts per million. OCD gave permission to close pit. Soil analytical are as follows; benzene - 0.5 mg/kg, total BTEX - 1 mg/kg, TPH - 10 mg/kg. Analytical results from the water phase of a saturated soil sample collected from the excavation area follows: benzene - 77.2 ug/L, toluene - 13 ug/L, ethylbenzene - 21.4 ug/L, xylene - 67.8 ug/l.

A RECON® survey was conducted and four groundwater samples were collected, one from each side of the pit. The samples were collected and analyzed using a laboratory-grade gas chromatograph by Philip Environmental's RECON® System. The on-site analytical results were as follows: probe hole (PH) -01, benzene - not detected (ND), toluene - 2 ug/L, ethylbenzene - ND, xylenes - <1 ug/L; PH-02, benzene - ND, toluene - <1 ug/L, ethylbenzene - ND, xylenes - <1 ug/L; PH-03, benzene - ND, toluene - ND, ethylbenzene - ND, xylenes - <1 ug/L; PH-04, benzene - <1 ug/L, toluene - <1 ug/L, ethylbenzene - ND, xylenes - <1 ug/L.

Dear Mr. Foust,

Enclosed is an update on those locations where EPNG has encountered groundwater during our pit remediation and closure project. The list represents the time period of 4/14/94 (project start) through 6/7/94. The twelve locations on the list is 3% of the total number of pits that have been closed through the above dates.

As we have discussed, EPNG will be informing you of what approach we will be taking regarding further action at these locations. If you have any questions regarding this information you may reach me at 599-2141.

Sincerely,

Sandra D. Miller
Sr. Environmental Scientist
