RE: CASE #3R-186
HAMMOND #41A WELL SITE
SAN JUAN COUNTY, NEW MEXICO

Dear Mr. Pope:

The New Mexico Oil Conservation Division (OCD) has reviewed El Paso Field Services (EPFS) September 2, 2003 "CLOSURE REQUEST FOR THE HAMMOND #41A". This document contains the results of EPFS's 2003 monitoring and remediation of contaminated ground water related to the closure of an unlined dehydration pit at the Hammond #41A well site in Unit O, Section 25, Township 27 North, Range 8 West, San Juan County, New Mexico. The document also requests final closure of the site based on remediation and monitoring actions taken to date.

A review of data in the above-referenced report shows that xylenes are present in monitor well MW-4 at concentrations in excess of the New Mexico Water Quality Control Commission (WQCC) ground water standard. Therefore, the OCD cannot approve the closure request for this site. The OCD requires that EPFS continue to monitor ground water quality at the site in accordance with their previously approved ground water remediation plan. The OCD will reconsider closure approval of the site when EPFS can provide the OCD with information showing that ground water quality in all site monitoring wells is below WQCC standards for a minimum of 4 consecutive quarters

If you have any questions, please call me at (505) 476-3491.

Sincerely,

William C. Olson
Hydrologist

RE: Closure Request for the Hammond #41A

Dear Mr. Olson:

El Paso Field Services (EPFS) hereby requests written approval of the closure of the Hammond # 41 A. The attached data supporting final closure of the above reference site includes: the most recent down gradient temporary monitoring well installation drilling log, installation diagram, field development form, field sampling form, final closure sample results and site location map. The monitoring well was installed approximately 45 feet down gradient of the former earthen pit as requested in the March 28, 2003 letter from the OCD to EPFS, RE: "D Loop Line Drip Site (Case# 3R166) Hammond # 41 (Case# 3R186) San Juan County, New Mexico", which also denied the request for closure. As you can see from the enclosed data from the down gradient monitoring well, Benzene, Toluene, Ethyl Benzene, and total Xylenes are at or below New Mexico Water Quality Control Commission Standards. Documentation supporting previous investigation, remediation and monitoring performed at the site have been submitted in earlier Annual Reports and closure requests.

Based on the enclosed data, EPFS requests written approval of closure of the Hammond # 41 A. If you have any questions concerning the enclosed closure request or require additional information please call me at (505) 599-2124.

Sincerely,

Scott T. Pope P.G.
Senior Environmental Scientist

RE: D LOOP LINE DRIP SITE (CASE# 3R166)
HAMMOND #41A PIT SITE (CASE #3R186)
SAN JUAN COUNTY, NEW MEXICO

Dear Mr. Pope:

The New Mexico Oil Conservation Division (OCD) has reviewed El Paso Field Services (EPFS) November 27, 2003 "CLOSURE REQUEST FOR THE D LOOP LINE DRIP AND HAMMOND #41A". This document contains the results of EPFS's remediation and monitoring of contaminated ground water related to the closure of unlined oil and gas production pits at 2 sites in the San Juan Basin. The documents also requests closure of the sites based on the remediation and monitoring actions taken to date and permission to plug and abandon the site monitoring wells.

The OCD's review of the above referenced document is addressed below:

A. The final pit closure and ground water remediation activities at the site D Loop Line Drip pit site located in Unit I, Sec. 33, T28N, R08W are satisfactory and the above referenced request for this site is approved. Please be advised that OCD approval does not relieve EPFS of responsibility if remaining contaminants pose a future threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve EPFS of responsibility for compliance with any other federal, state or local laws and regulations.

B. A review of OCD's file for the Hammond #41 A site, located in Unit O, Sec. 25, T27N, R08W, shows that, on July 18, 2001, the OCD required that EPFS install additional ground water monitoring wells to monitor and determine the extent of ground water contamination pursuant to their previously approved ground water investigation plan. This requirement was based on the lack of ground water quality monitoring data downgradient and northwest of the former pit location. The OCD does not have any information to show that this work was completed. Therefore, the above-referenced request for this site is denied. The OCD will reconsider closure approval of the site when EPFS can provide the OCD with this information.

If you have any questions, please call me at (505) 476-3491.

Sincerely,

William C. Olson

RE: 2002 Pit Project Annual Groundwater Report

Dear Mr. Olson:

In accordance with reporting requirements, El Paso Field Services (EPFS) has enclosed annual reports for the 30 remaining groundwater impacted sites that were identified during our pit closure project of 1994 / 1995.

EPFS has organized the 30 Annual Reports (Volumes 1, 2 and 3) by land type. Volume 1 contains Annual Reports for sites found on Federal land. Volume 2 contains Non Federal sites and Volume 3 contains sites on Navajo land. Of the 30 reports submitted, EPFS is requesting closure of three sites located on Navajo lands. Of the three Navajo sites submitted for closure OCD has closed the Charley Pah #4 and the John Charles #8. The Rementa et al #1 has not been closed by either agency and EPFS reiterates request for closure of this site. EPFS understands closure of groundwater sites on Navajo land falls under jurisdiction of the Navajo Nation Environmental Protection Agency and original documents have been submitted to them for review. Other Navajo sites are included in the report for your information.

Three additional sites were submitted for closure in 2002. EPFS recently has received closure on the W.D. Heath B-5. Closure approval is pending on the D Loop Line Drip and Hammond # 41A. All of these sites are included in the 2002 Annual Report.

If you have any questions concerning the enclosed reports, please call me at (505) 599-2124.

Sincerely,

Scott T. Pope P.G.
Senior Environmental Scientist

RE: Closure Request for the D Loop Line Drip and Hammond # 41A

Dear Mr. Olson:

El Paso Field Services (EPFS) hereby requests written approval of the closure of the D Loop Line Drip and Hammond # 41A. The attached reports detail all applicable investigation, remediation and monitoring performed at the sites.

If you have any questions concerning the enclosed closure requests or require additional information please call me at (505) 599-2124.

Sincerely,

Scott T. Pope P.G.

RE: Corrected Request for Extension for 2000 Pit Project Annual Groundwater Report

Dear Mr. Olson:

Please except this request for extension with the dates corrected to reflect the current year.

The pit project annual groundwater report is due to you on March 1, 2000. Pursuant to our February 8, 2000 telephone conversation, El Paso Field Services (EPFS) hereby requests a one-month extension to the submittal date. EPFS will submit the pit project annual report to your office by April 3, 2000.

If you have any questions or require any additional information, please contact me at (505) 599-2124.

Sincerely,

Scott T. Pope P.G.

RE: 1998 Pit Project Annual Groundwater Report

Dear Mr. Olson:

In accordance with reporting requirements, El Paso Field Services (EPFS) has enclosed annual updates for the 49 remaining groundwater impacted locations that were identified during our pit closure project of 1994 / 1995.

Of the 49 reports, EPFS hereby requests closure of 18 of these locations. The 18 sites EPFS is requesting closure on are presented in 4 separate binders entitled "Final Closure Report for Groundwater Sites with Four Consecutive Quarters Below Standards".

The Jaquez Com. C #1 and Jaquez Com. E #1 site is included in a separate report which is entitled "Jaquez Com. C #1 and Jaquez Com. E #1 Annual Report for Soil and Groundwater Remediation".

If you have any questions concerning the enclosed reports or closure requests, please call me at (505) 599-2124.

Subject: Semi-Annual El Paso Field Services Pit Project Groundwater Report

Mr. Olson,

El Paso Field Services (EPFS) has encountered groundwater at various locations while investigating and or remediating exempt hydrocarbon unlined pits. The enclosed list includes all locations which are in this category. Please find enclosed, the locations and status of each individual pit.

These pits are being remediated according to the "EPFS Remediation Plan for Groundwater Encountered During Pit Closure Activities" dated November 29,1995.

EPFS requests that future reports for this project be submitted on a yearly basis to begin December 1, 1997 which will include soil boring logs, monitoring well completion diagrams, analytical data, groundwater elevation data, any risk analysis and type of remediation method.

For questions regarding this report please contact Ricky Cosby at (505)599-2158.

Ricky D. Cosby
Compliance Specialist
