REPORTS

**APRIL DATE:
2002**

April 26, 2002
AMEC Job No. 2-517-000008

Energy, Minerals and Natural Resources Department
New Mexico Oil Conservation Division
1220 St Francis Drive
Santa Fe, New Mexico 87505

Attention: Mr. Bill Olson

**RE: MONITORING WELL SAMPLING
CITY OF CARLSBAD WELL FIELD
CARLSBAD, NEW MEXICO**

This letter report presents the results of AMEC Earth and Environmental's (AMEC) ground water sampling from MW-3 in the City of Carlsbad Well Field southwest of Carlsbad, New Mexico. AMEC submitted a work plan to the New Mexico Oil Conservation Division (OCD) dated February 1, 2002 outlining the scope of services to be performed for the investigation. The project was authorized by the OCD in correspondence to AMEC dated February 6, 2002. The project followed the terms and conditions of AMEC's Site Maintenance and Monitoring Contract (PA No. 00-805-09-17658) awarded to AMEC by the State of New Mexico, General Services Department.

The study consisted of developing and purging water from the existing monitor well MW-3, obtaining and submitting ground water samples for laboratory analysis, and disposing of purged water at an OCD approved facility. This report includes a summary of the field activities, presents the laboratory reports, and provides documentation for the purged water disposal.

Field Program

On February 7 and 8, 2002, AMEC personnel traveled to the site and attempted to develop monitor well MW-3 with a Grunfos submersible pump. Depth to ground water was measured at 77.10 feet below the top of casing (toc); the total depth of the well was measured at 125.80 feet below toc. IW, Inc. Vacuum Truck Service was on standby at the site to transport purged water to a disposal facility. After numerous attempts to purge the well, it was determined the pump would not function due to the high density (i.e. high total dissolved solids content) of the ground water.

AMEC personnel returned to the site on March 4, 2002 to develop the well. Geomechanics Southwest provided a drilling rig with a wire line and a clean, PVC bailer to develop the well. The well was developed and purged until the water temperature, pH, and conductivity stabilized. Purged water was containerized for later disposal. Twenty-four hours after development, on March 5, 2002, AMEC personnel returned to the site and purged the well with the rig mounted bailer until water temperature, pH, and conductivity stabilized. Purged water was containerized for later disposal. Ground water samples were obtained from the well with the PVC bailer at that time.

The ground water samples obtained were placed in containers supplied by the laboratory and placed in a cooler with ice. The samples were shipped to Trace Analysis of Lubbock, Texas for chemical analysis by EPA methods listed in the attachments. Each ground water sample was collected, containerized, and preserved according to standard laboratory protocol. Field notes are presented in the attachments.

02 APR 29 PM 1:
OL CONSERVATION DIV

New Mexico Oil Conservation Division
Monitoring Well Development and Sampling
City of Carlsbad Well Field, Carlsbad, New Mexico
AMEC Project No. 2-517-000008
April 26, 2002

The water samples were analyzed for benzene, toluene, ethylbenzene, and total xylenes (BTEX) by EPA Method 8021 and for gasoline range total petroleum hydrocarbons (GRO-TPH) and diesel range total petroleum hydrocarbons (DRO-TPH) by EPA Method 8015B. In addition, the samples were tested for pH, alkalinity, specific conductance, chloride, total dissolved solids, fluoride, nitrate, sulfate, calcium, magnesium, potassium, sodium, and a list of 16 metals by approved EPA methods. Copies of the chain-of-custodices and chemical analyses reports for ground water samples are provided in with the laboratory reports in the attachments.

No BTEX or TPH were detected in the water samples. Of note, total dissolved solids were 271,000 mg/L and chlorides were 117,000 mg/L.

The containerized purge water was transported to Controlled Recovery of Hobbs, New Mexico. The waste manifests are included in the attachments.

We appreciate the opportunity to provide environmental services to the Oil Conservation Division for this project. If you have any questions regarding this report, please give me a call at (505) 821-1801.

Respectfully submitted,

AMEC Earth & Environmental, Inc.

Bob Wilcox, P.G.
Senior Project Manager

Report Date: April 25, 2002
Order ID Number: A02030711

Project Number: 2517000008
Project Name: Carlsbad Well Development & Sampling
Project Location: Carsbad-City Well

Enclosed are the Analytical Results and Quality Control Data Reports for the following samples submitted to TraceAnalysis, Inc.

| Sample | Description | Matrix | Date Taken | Time Taken | Date Received |
|--------|-------------|--------|------------|------------|---------------|
| 192304 | MW-3 | Water | 3/5/02 | : | 3/7/02 |

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed. Note: the RDL is equal to MQL for all organic analytes including TPH.

This report consists of a total of 17 pages and shall not be reproduced except in its entirety including the chain of custody (COC), without written approval of TraceAnalysis, Inc.

¹Chloride was re-ran on IC030802-2.sch (PB18141; QC18713). ICV %IA = 90; CCV %IA = 97; matrix spikes RPD = 0, %EA = 91; LCS spikes RPD = 1, %EA = 93.

²Sample ran out of hold time for NO₃. Sample came in on the last day of the hold time, but could not be put on the IC before the hold time had expired. Sample was ran the day it was received.

³Sulfate was re-ran on IC030802-2.sch (PB18141; QC18713). ICV %IA = 93; CCV %IA = 97; matrix spikes RPD = 0, %EA = 91; LCS spikes RPD = 2, %EA = 94.

Analytical and Quality Control Report

Bob Wilcox
AMEC Inc.
1712-A W Hadley Ave.
Las Cruces, NM 88005

Report Date: March 19, 2002

Order ID Number: A02030711

Project Number: 2517000008
Project Name: Carlsbad Well Developement & Sampling
Project Location: Carsbad-City Well

Enclosed are the Analytical Results and Quality Control Data Reports for the following samples submitted to TraceAnalysis, Inc.

| Sample | Description | Matrix | Date Taken | Time Taken | Date Received |
|--------|-------------|--------|------------|------------|---------------|
| 192304 | MW-3 | Water | 3/5/02 | : | 3/7/02 |

0

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed. Note: the RDL is equal to MQL for all organic analytes including TPH.

This report consists of a total of 16 pages and shall not be reproduced except in its entirety including the chain of custody (COC), without written approval of TraceAnalysis, Inc.

Dr. Blair Leftwich, Director

Analytical Report

Sample: 192304 - MW-3

Analysis: Alkalinity Analytical Method: E 310.1 QC Batch: QC18844 Date Analyzed: 3/12/02
Analyst: RS Preparation Method: N/A Prep Batch: PB18253 Date Prepared: 3/12/02

| Param | Flag | Result | Units | Dilution | RDL |
|------------------------|------|--------|---------------|----------|-----|
| Hydroxide Alkalinity | | <1.0 | mg/L as CaCo3 | 1 | 1 |
| Carbonate Alkalinity | | <1.0 | mg/L as CaCo3 | 1 | 1 |
| Bicarbonate Alkalinity | | 1518 | mg/L as CaCo3 | 1 | 1 |
| Total Alkalinity | | 1518 | mg/L as CaCo3 | 1 | 1 |
