RE: Stage 1 Abatement Plan Proposals
Williams Pit Site (AP-22)
Lattion Pit Site (AP-23)
Inex Pit Site (AP-24)
Scripps Pit Site (AP-25)

Dear Mr. von Gonten:

Enclosed please find the amended Stage 1 Abatement Plan Proposals for the above sites. The New Mexico Oil Conservation Division (NMOCD) has required submittal of abatement plans for the subject sites. An amended Stage 1 Abatement Plan Proposal was submitted on February 15, 2005. The OCD disapproved the workplans in letters dated July 18, 2005.

The amended workplans submitted with this letter address OCD's concerns detailed in the July letter including the need for additional soil borings to characterize subsurface conditions within the pit and additional groundwater monitoring wells to determine quality of groundwater downgradient from the pits.

If you have any questions on the submittals, please contact me at 505-748-4181.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dan Dolan', is written over a large, stylized circular scribble.

Artesia, New Mexico 88210

**RE: YATES PETROLEUM COMPANY
AMENDED STAGE 1 ABATEMENT PLAN PROPOSAL AND WORK PLAN
SCRIPPS PIT SITE (AP-25)**

Dear Mr. Dolan:

The New Mexico Oil Conservation Division (OCD) has reviewed the Yates Petroleum Corporation's (Yates) AMENDED STAGE 1 ABATEMENT PLAN PROPOSAL AND WORK PLAN - SCRIPPS SITE (AP-25) submitted on February 15, 2005, in response to OCD's letter of October 6, 2004. OCD required Yates to submit this workplan because it had not completely defined the extent of the ground water contamination at the Scripps site. Yates requested and received a 45 day extension to the required due date of December 31, 2004.

As discussed below in detail, OCD has noted several problems with this proposed workplan that must be addressed before the workplan can be approved.

- 1) Yates has not adequately characterized the site conditions at the Scripps pit site using all the data that it has collected. Cross sections clearly demonstrate that the chlorides and hydrocarbons released from the Scripps pit have contaminated both soil and ground water beneath the pit. Yates must revise its Stage 1 workplan by providing an interpretation of the previously collected data and support its interpretation with an appropriate number of isoconcentration maps and cross-sections that depict the contamination that has been released

from the former pit. Only after it interprets the existing data can Yates propose a meaningful workplan to complete its investigation.

2) The workplan must be revised to propose a sufficient number of additional soil borings beneath and adjacent to the former pit that will enable Yates to completely characterize the release from the Scripps pit. The workplan must also propose a sufficient number of additional downgradient monitor wells that will enable Yates to characterize the ground water contamination beneath and downgradient from its pit and for use in a ground water monitoring program. The workplan must also propose additional contingent soil borings and monitor wells if the next phase of the Stage 1 investigation fails to completely delineate the release. The workplan must also specify that Yates will analyze for all of the constituents specified by OCD in its February 1, 2002, conditional approval letter. OCD notes that Yates has not analyzed samples for the New Mexico Water Quality Control Commission (WQCC) metals as required.

3) The workplan must also address the requirement for Yates to provide the data necessary to select and design an effective abatement option, which it must propose in a separate Stage 2 Abatement Plan to be submitted after the Stage 1 investigation has been concluded. Of course, Yates may propose appropriate remedial actions to be taken concurrently with the Stage 1 investigation.

4) Yates' Amended Stage 1 Abatement Plan includes a proposal to conduct several routine action items, such as resurveying the monitor well elevations, the installation of two additional monitor wells, measuring water levels and ground water quality, and submitting a site investigation report. Taking these actions will not enable Yates to meet the general performance standard for conducting a Stage 1 Abatement Plan as specified in OCD Rule 19.E.3. The proposed Stage 1 workplan will not allow Yates to define the vertical and horizontal extent and magnitude of vadose zone and ground water contamination and to determine the rate and direction of contaminant migration.

4) In its proposed Action Plan, Yates proposes to plug monitor well MW-4. This pit well is the single most useful data point that Yates has at this site and the proposal to abandon this well appears to be completely without merit. OCD will not approve Yates' proposal to plug and abandon monitor well MW-4.

OCD requires Yates to submit a revised Stage 1 Abatement Plan for its Scripps pit site that addresses the above items in accordance with OCD's 1993 remediation guidelines by August 19, 2005, with a copy provided to OCD's Artesia District Office.

If you have any questions, please contact me at (505) 476-3488.

Sincerely,

Glenn von Gonten

Mr. Ed Martin
New Mexico Oil Conservation Division
1220 South St. Francis Dr.
Santa Fe, New Mexico 87505

Dear Ed:

As per our conversation today this letter is to request 45-day extension on submittal of the work plan for the Yates Petroleum Corporation former Scripp Pit Site (AP-25). The letter dated October 6, 2004 required submittal of the work plan by December 31, 2004. The Scripp Pit Site is located in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico.

Thank you for your consideration in this matter.

Sincerely,

Bob Allen ASP, CHMM, REM, CET, CES

**RE: STAGE 1 ABATEMENT PLAN PROPOSALS
WILLIAMS PIT SITE (AP-22)
LATTION PIT SITE (AP-23)
INEX PIT SITE (AP-24)
SCRIPP PIT SITE (AP-25)**

Dear Mr. Dolan:

The New Mexico Oil Conservation Division (OCD) has reviewed the Yates Petroleum Corporation's (Yates) February 19, 2004 correspondence and the following accompanying documents:

- June 2003 "PRELIMINARY SITE INVESTIGATION REPORT, FORMER WILLIAMS PIT LOCATION, NE ¼ OF THE NW ¼ OF SECTION 25, TOWNSHIP 18 SOUTH, RANGE 26 EAST, EDDY COUNTY, NEW MEXICO".
- June 2003 "PRELIMINARY SITE INVESTIGATION REPORT, FORMER LATTION PIT LOCATION, NE ¼ OF THE SW ¼ OF SECTION 23, TOWNSHIP 18 SOUTH, RANGE 26 EAST, EDDY COUNTY, NEW MEXICO".
- June 2003 "PRELIMINARY SITE INVESTIGATION REPORT, FORMER INEX PIT LOCATION, SE ¼ OF THE NW ¼ OF SECTION 26, TOWNSHIP 18 SOUTH, RANGE 26 EAST, EDDY COUNTY, NEW MEXICO".
- June 2003 "PRELIMINARY SITE INVESTIGATION REPORT, FORMER SCRIPPS PIT LOCATION, NW ¼ OF THE SW ¼ OF SECTION 25, TOWNSHIP 18 SOUTH, RANGE 26 EAST, EDDY COUNTY, NEW MEXICO".

These documents contain the results of Yates' Stage 1 investigation of the extent of contamination related to former unlined pits at Yates' Williams Pit Site located in Unit C, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico; the Lattion Pit Site located in Unit K, Section 23, Township 18 South, Range 26 East, Eddy County, New Mexico; the Inex Pit Site located in Unit F, Section 26, Township 18 South, Range 26 East, Eddy County and; the Scripp Pit Site located in Unit L, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico.

A review of the above-referenced reports shows that the extent of ground water contamination at each site has not been completely determined. The OCD requires that Yates submit a work plan to the OCD to complete the definition of the extent of ground water contamination at each site. The work plan shall be submitted to the OCD Santa Fe Office by December 31, 2004 with a copy provided to the OCD Artesia District Office.

If you have any questions, please contact me at (505) 476-3491.

Sincerely,

ABATEMENT PLAN AP-23, LATTION PIT SITE
ABATEMENT PLAN AP-24, INEX PIT SITE
ABATEMENT PLAN AP-25, SCRIPP PIT SITE**

Dear Ms. Norton:

The New Mexico Oil Conservation Division (OCD) has reviewed Yates Petroleum Corporation's (Yates) July 31, 2002 correspondence titled "ABATEMENT PLANS AP-22 WILLIAMS PIT SITE, ABATEMENT PLANS AP-23 LATTION PIT SITE, ABATEMENT PLANS AP-24 INEX PIT SITE,, ABATEMENT PLANS AP-25 SCRIPP PIT SITE". This document contains Yates' request for an extension of the deadline for submission of Stage 1 investigation reports for the abatement plans on the above listed sites due to the closing of their consultants office.

The above-referenced request to extend the Stage 1 investigation report submission deadline from August 1, 2002 to September 1, 2002 is approved.

If you have any questions, please contact me at (505) 476-3491.

RE: Abatement Plans AP-22 Williams Pit Site
Abatement Plans AP-23 Lattion Pit Site
Abatement Plans AP-24 Inex Pit Site
Abatement Plans AP-25 Scripp Pit Site

Dear Mr. Olson,

Yates is in the process of preparing Stage I investigation reports for abatement plans for the above sites. These reports were due to be submitted to the Division on August 1, 2002.

Mr. Jeffrey Minchak with Harding ESE, Inc. had been retained to prepare the reports. Harding ESE, Inc. is now in the process of closing their Albuquerque office and is unable to complete the project. Yates is now in the process of contracting with another firm to complete the project and requests an extension until September 1, 2002.

We apologize for the delay and hope that you will recognize our situation and allow the extension. If you have any questions, please contact me at 505-748-4185 or via email at lnorton@ypcnm.com.

Sincerely,

Re: Request for Extension of Stage 1 Investigation Reports
Abatement Plan AP-25 Scripp Pit Site
Abatement Plan AP-24 Inex Pit Site
Abatement Plan AP-23 Lattion Pit Site
Abatement Plan AP-22 Williams Pit Site

Dear Mr. Anderson:

At the request of Yates Petroleum Corporation (Yates), Harding ESE is requesting an extension of time for the submittal of the Stage I Investigation Reports for the four above-referenced sites. Yates is requesting a 120-day extension of the due date for the submittal of the four Stage I Investigation Reports from April 1, 2002 to August 1, 2002. Yates has budgeted the Stage I work for initiation during the second quarter of calendar year 2002. Scheduling the work within this time frame allows Yates to more effectively monitor their non-recurring environmental expenses during this period of depressed oil and natural gas prices.

In 1997, Yates purchased production facilities, including the above referenced sites, from H&S Oil Company (H&S). H&S was a small, privately operated oil and gas producer that did not maintain an effective environmental management or compliance program. Since purchasing the facilities, Yates has made a considerable investment of both time and financial resources which has resulted in significant improvements to the environmental conditions of the Sites. The primary result of the improvements made to-date by Yates is the removal of the hydrocarbon source areas by properly closing the former unlined waste disposal pits, as presented in the Stage I Abatement Plan Proposals for each of the four sites. Once investigation activities are underway, the scope of work from each of the Stage I Abatement Plan Proposals will be

Mr. Roger Anderson
Environmental Bureau Chief
Oil Conservation Division
February 21, 2002

Page 2 of 2

implemented. Additionally, the four conditions set forth in the Oil Conservation Division (OCD) letter dated February 1, 2002 will be met.

Please direct any questions or comments regarding this request or the Stage I Investigation Reports to me at (505) 248-0017 or to Ms. Lisa Norton, Yates Environmental Coordinator, at (505) 748-4185.

Sincerely,
HARDING ESE, Inc.

RE: YATES PETROLEUM STAGE 1 ABATEMENT PLAN PROPOSALS
WILLIAMS PIT SITE (AP-22)
LATTION PIT SITE (AP-23)
INEX PIT SITE (AP-24)
SCRIPP PIT SITE (AP-25)

Dear Mr. Wilson:

The Oil Conservation Division (OCD) has received your October 10, 2000 letter commenting on Yates Petroleum Corporation's (Yates) proposed Stage 1 abatement plans for investigation of the extent of contamination related to former unlined pits at Yates' Williams Pit Site located in Unit C, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico; the Lattion Pit Site located in Unit K, Section 23, Township 18 South, Range 26 East, Eddy County, New Mexico; the Inex Pit Site located in Unit F, Section 26, Township 18 South, Range 26 East, Eddy County and; the Scripp Pit Site located in Unit L, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico.

Pursuant to OCD Rule 19, the OCD required abatement plans because ground water at each site was found to be contaminated in excess of state standards during prior soil remediation and investigation activities. A review of the OCD's records shows that the water wells that you are concerned about are upgradient of the sites being investigated by Yates and therefore any problems with these wells would not be related to the contamination at the above-referenced sites. However, the OCD welcomes any comments you may have on these sites. Due to your interest in the investigations, you will receive copies of all future OCD correspondence concerning the abatement plan.

The abatement plan is broken into 2 stages, a Stage 1 Abatement Plan Proposal and a Stage 2 Abatement Plan Proposal. The purpose of the Stage 1 Abatement Plan Proposal is for the responsible person to determine the magnitude and extent of contamination that is related to their operations. The rules require that the responsible person provide public notice of the plan and allows a 30 day period

for receipt of public comments. Based upon a technical review of the proposal and consideration of the public comments, the OCD resolves deficiencies in the proposal with the responsible person and issues administrative approval of the Stage 1 Abatement Plan. The responsible person then conducts the investigations at the site and provides a Stage 1 Investigation Report to the OCD for approval.

Once the extent of contamination has been determined, the responsible person is required to submit a Stage 2 Abatement Plan Proposal which contains a proposed plan to remediate the site to state standards. The rule also requires that the responsible person provide public notice of the plan and allows a 30 day period for receipt of public comments and public requests for a hearing on the merits of the plan. A request for a public hearing must be in writing and must include the reasons why a hearing should be held. Based upon a technical review of the proposal and consideration of the public comments, the OCD attempts to resolve deficiencies in the proposal with the responsible person and then determines whether the Stage 2 Abatement Plan is administratively approvable or denied. If the plan is administratively denied, the applicant will be notified and it will be its responsibility to request a hearing appealing the denial. If the Stage 2 Abatement Plan is determined to be administratively approvable, the OCD will notify the applicant and all intervenors of the conditions under which the plan would be approved. Intervenors will be allowed fifteen (15) days from receipt of the determination to notify the OCD whether they still wish to proceed to hearing.

The OCD appreciates your input on environmental and public health issues relating to this abatement plan. If you have any questions or comments, please do not hesitate to contact me at (505) 476-3491.

Sincerely,

William C. Olson
Hydrologist

Dear Roger,

Pursuant to OCD Rule 19.G and your letter dated September 25, 2001, enclosed are:

- 1) Affidavits of Publication from the Albuquerque Journal and Artesia Daily Press
- 2) Certification of written notice via regular mail to:
 - a. Surface owners within one (1) mile perimeter of the sites
 - b. Persons on list provided by the Division
- 3) Certified mail receipts from:
 - a. Eddy County Commission
 - b. New Mexico Trustee for Natural Resources

Yates requests the Division complete their review of the above Stage 1 Abatement Plans Proposals.

If you need additional information, please contact me at 505-748-4185.

Sincerely,

Lisa Norton
Environmental Coordinator

Certification of Written Notice

Yates Petroleum Corporation (Yates) has submitted a Stage I Water Abatement Plan to the New Mexico Oil Conservation Division (OCD) for four (4) former unlined disposal pits located south of Artesia in Eddy County.

Pursuant to New Mexico Oil Conservation Division (OCD) Rule 19.G, I certify that written notice has been given to:

- (a) Surface owners of record within one (1) mile perimeter of locations - see attached list (via regular mail)
- (b) The Eddy County Commission (via certified mail)
- (c) Persons identified by the OCD Director who requested notification - see attached list (via regular mail)
- (d) New Mexico Trustee for Natural Resources (via certified mail)

Additionally, notice was published in the Artesia Daily Press and the Albuquerque Journal. (see attached affidavits of publication.)

NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal has been submitted to the Director of the Oil Conservation Division, 1200-SB, Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 478-3400, 10/9/01.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-22) for the Williams Pit Site, located in Unit C of Section 25, Township 18 South, Range 28 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-23) for the Laffon Pit Site, located in Unit K of Section 23, Township 18 South, Range 28 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-24) for the Inex Pit Site, located in Unit F of Section 26, Township 18 South, Range 28 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-25) for the Schopp Pit Site, located in Unit L of Section 25, Township 18 South, Range 28 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Any interested person may obtain the information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division, at the address given above. The Stage 1 Abatement Plan Proposal may be viewed at the above address or at the Oil Conservation Division Artesia District Office, 1301 W. Grand Ave., Artesia, New Mexico 88210, Telephone (505) 748-7283 between 8:00 a.m. and 5:00 p.m., Monday through Friday.

DEPARTMENT
OIL CONSERVATION
DIVISION**

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposal, have been submitted to the Director of the Oil Conservation Division, 1220 St. Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 478-3440: Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185 105 South Fourth St., Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-23) for the Lutton Pit Site, located in Unit K of Section 23, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-24) for the Inex Pit Site, located in Unit F of Section 26, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-25) for the Scripp Pit Site, located in Unit L of Section 25, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities. Any interested person may obtain further information from the Oil Conservation Division, and may submit written comments to the Director of the Oil Conservation Division, at the address given above. The Stage 1 Abatement Plan Proposals may be viewed at the above address or at the Oil Conservation Division Artesia District Office, 1301 W. Grand Ave., Artesia, New Mexico 88210, Telephone (505) 748-1283 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on the proposed Stage 1 Abatement Plan Proposals, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted. DIVISION OF OIL CONSERVATION 10-8-01
12 ST. FRANCIS DR.
SANTA FE, NM 87504

ATTEN: Bill CONSERVATION DIV.
01 OCT 11 PM 1:21

To who it may concern

BB & Wanda Wilson own a small farm & grass land every direction from the abatement plan proposal Yates Pet. has submitted to the oil conservation.

The wells I am most concerned about are on my farm to the East of the 4 sides.

I have 2 domestic wells one taste so bad you can't drink the water the other doesn't taste bad but hasn't been tested since it was drilled approx. 3 years ago. We haul drinking water.

I have an irrigation well Arterian that when you first turn it on you can see a blue haze when you look at sprinklers.

When you pull this well the pipe is coated with oil.

About every three years the pipe has to be replaced it is ate up. I own around 8,000 acres with in 5 miles of this area.

I own several blocks of land in the old Dayton town site if the water is not good I won't be able to sell these.

I have owned some of this land for 30 years. I am familiar with Yates Pet. and how they operate. I have had the misfortune to have to deal with them. They get what they want.

I don't see how they can say that if this water is contaminated that these 4 sites has caused the problem when their disregard for the land owner and environment has occurred on this and other area for years.

I understand Gates has had wells since the late 1920 in the Dayton Area. The legal description is as follows:

old
Farm
wells

			TOWNS.	RANGE.
RA-888A	NE $\frac{1}{4}$	NE $\frac{1}{4}$	SECTION 21	-18S 26E.
RA-888A	NW $\frac{1}{4}$	NW $\frac{1}{4}$	22	18S 26E

The farm lays in these same areas & legal description
our land within $\frac{1}{2}$ mile from the sites except on the South side
If you need more info. please let me know.

CERTIFIED MAIL
RETURN RECEIPT NO: 5357-7942

Ms. Lisa Norton
Yates Petroleum Corporation
105 South Fourth St.
Artesia, New Mexico 88210

RE: STAGE 1 ABATEMENT PLAN PROPOSALS
WILLIAMS PIT SITE (AP-22)
LATTION PIT SITE (AP-23)
INEX PIT SITE (AP-24)
SCRIPP PIT SITE (AP-25)

Dear Ms. Norton:

The New Mexico Oil Conservation Division (OCD) has reviewed the following Yates Petroleum Corporation (Yates) documents:

- July 3, 2001 "TRANSMITTAL OF STAGE 1 ABATEMENT PLAN PROPOSALS, ABATEMENT PLAN AP-25 SCRIPP PIT SITE, ABATEMENT PLAN AP-24 INEX PIT SITE, ABATEMENT PLAN AP-23 LATTION PIT SITE, ABATEMENT PLAN AP-22 WILLIAMS PIT SITE"
- July 2, 2001 "STAGE 1 ABATEMENT PLAN PROPOSAL, ABATEMENT PLAN AP-22, WILLIAMS PIT SITE, EDDY COUNTY, NEW MEXICO".
- July 2, 2001 "STAGE 1 ABATEMENT PLAN PROPOSAL, ABATEMENT PLAN AP-23, LATTION PIT SITE, EDDY COUNTY, NEW MEXICO".
- July 2, 2001 "STAGE 1 ABATEMENT PLAN PROPOSAL, ABATEMENT PLAN AP-24, INEX PIT SITE, EDDY COUNTY, NEW MEXICO".
- July 2, 2001 "STAGE 1 ABATEMENT PLAN PROPOSAL, ABATEMENT PLAN AP-25, SCRIPP PIT SITE, EDDY COUNTY, NEW MEXICO".

These documents, which were submitted on behalf of Yates by their consultant Harding ESE, contain Yates' proposed Stage 1 abatement plan proposals for investigation of the extent of contamination related to former unlined pits at Yates' Williams Pit Site located in Unit C, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico; the Lattion Pit Site located in Unit K, Section 23, Township 18 South, Range 26 East, Eddy County, New Mexico; the Inex Pit Site located in Unit F, Section 26, Township 18 South, Range 26 East, Eddy County and; the Scripp Pit Site located in Unit L, Section 25, Township 18 South, Range 26 East, Eddy County, New Mexico

The OCD has determined that the above referenced Stage 1 Abatement Plan Proposals are administratively complete. Before the OCD can complete a review of the Stage 1 proposals, the OCD requires that:

1. Yates issue by October 10, 2001 the enclosed Stage 1 notice of publication in the Albuquerque Journal and Artesia Daily Press pursuant to OCD Rule 19.G.(2).
2. Prior to issuing public notice, Yates shall issue written notice of the Stage 1 proposals pursuant to OCD Rule 19.G.(1). Enclosed you will find a 3.5" disk containing a "Word" listing "those persons, as identified by the Director, who have requested notification" pursuant to OCD Rule 19.G.(1).(d). The disk also contains the contact for the New Mexico Trustee for Natural Resources.
3. Yates provide the OCD with proof of publication and proof of written notice by October 24, 2001.

If you have any questions, please contact Bill Olson of my staff at (505) 476-3491.

Sincerely,

Roger C. Anderson
Environmental Bureau Chief

NOTICE OF PUBLICATION

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Oil Conservation Division Regulations, the following Stage 1 Abatement Plan Proposals have been submitted to the Director of the Oil Conservation Division, 1220 St. Francis Dr., Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-22) for the Williams Pit Site, located in Unit C of Section 25, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-23) for the Lattion Pit Site, located in Unit K of Section 23, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico, 88210, has submitted a Stage 1

Abatement Plan Proposal (AP-24) for the Inex Pit Site, located in Unit F of Section 26, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Yates Petroleum Corporation, Lisa Norton, Environmental Coordinator, Telephone (505) 748-4185, 105 South Fourth St., Artesia, New Mexico, 88210, has submitted a Stage 1 Abatement Plan Proposal (AP-25) for the Scripp Pit Site, located in Unit L of Section 25, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. An unlined disposal pit was formerly operated at the site. Petroleum-related contamination in excess of New Mexico Water Quality Control Commission standards has been observed in ground water at the site. The Stage 1 Abatement Plan Proposal presents the following activities: determine site geology and hydrogeology; conduct a registered water well search within a 1 mile radius of the site; install monitoring wells; collect soil samples for field screening and/or laboratory analysis from each boring; collect ground water samples for laboratory analysis from each monitoring well; obtain depth to ground water measurements and calculate the ground water gradient and direction; survey all well locations by a professional land surveyor registered in the State of New Mexico; preparation of a report; and a schedule for implementation of all investigation activities.

Any interested person may obtain further information from the Oil Conservation Division and may submit written comments to the Director of the Oil Conservation Division, at the address given above. The Stage 1 Abatement Plan Proposals may be viewed at the above address or at the Oil Conservation Division Hobbs District Office, 1625 N. French Drive, Hobbs, New Mexico 88240, Telephone (505) 393-6161 between 8:00 a.m. and 4:00 p.m., Monday through Friday. Prior to ruling on the proposed Stage 1 Abatement Plan Proposals, the Director of the Oil Conservation Division shall allow at least thirty (30) days after the date of publication of this notice during which written comments may be submitted.

Re: Transmittal of Stage 1 Abatement Plan Proposals
Abatement Plan AP-25 Scripp Pit Site
Abatement Plan AP-24 Inex Pit Site
Abatement Plan AP-23 Lattion Pit Site
Abatement Plan AP-22 Williams Pit Site

Dear Mr. Anderson:

Harding ESE is providing you with a copy of each of the above referenced Stage I Abatement Plan Proposals (Abatement Plans) for four former pit locations. The Abatement Plans have been prepared in accordance with the Oil Conservation Division (OCD) requirements set forth in the letter of March 7, 2001 to Yates Petroleum Corporation (Yates). Harding ESE is also transmitting one copy of each Abatement Plan to Mr. Mike Stubblefield, in the OCD-Artesia office.

Please direct any questions or comments regarding the Abatement Plans to me at (505) 248-0017 or to Ms. Lisa Norton, Yates Environmental Coordinator, at (505) 748-4185.

Sincerely,
HARDING ESE

Jeffrey D. Minchak, P.G.
Senior Project Geologist

**RE: ABATEMENT PLAN AP-22, WILLIAMS PIT SITE
ABATEMENT PLAN AP-23, LATTION PIT SITE
ABATEMENT PLAN AP-24, INEX PIT SITE
ABATEMENT PLAN AP-25, SCRIPP PIT SITE**

Dear Ms. Norton:

The New Mexico Oil Conservation Division (OCD) has reviewed Yates Petroleum Corporation's (Yates) April 27, 2001 correspondence titled "ABATEMENT PLAN AP-25 SCRIPP PIT SITE, ABATEMENT PLAN AP-24 INEX PIT SITE, ABATEMENT PLAN AP-23 LATTION PIT SITE, ABATEMENT PLAN AP-22 WILLIAMS PIT SITE". This document contains Yates' request for an extension of the deadline for submission of abatement plans for the above listed sites from May 7, 2001 to July 7, 2001.

The above-referenced request is approved. If you have any questions, please contact Bill Olson at (505) 827-7154.

Sincerely,

for Roger C. Anderson
Environmental Bureau Chief

**RE: Abatement Plan AP-25 Scripp Pit Site
Abatement Plan AP-24 Inex Pit Site
Abatement Plan AP-23 Lattion Pit Site
Abatement Plan AP-22 Williams Pit Site**

Dear Mr. Anderson,

Your letters dated March 7, 2001 request a "Stage 1 abatement plan investigation proposal" pursuant to OCD Rule 10.E.1 and OCD Rule 19.E.3 by May 7, 2001 for the above locations.

Yates is requesting an extension of sixty (60) days and proposes submission of plans on or before July 7, 2000. We have retained Jeff Minchak with Harding ESE to prepare the plans.

Please contact me at 505-748-4185 or Mr. Minchak at 505-248-0017 if you have questions or need additional information.

Sincerely,

A handwritten signature in cursive script that reads "Lisa Norton".

**RE: ABATEMENT PLAN AP-25
SCRIPP PIT SITE**

Dear Ms. Norton:

The New Mexico Oil Conservation Division (OCD) has reviewed Yates Petroleum Corporation's (Yates) December 15, 2000 "PIT CLOSURE FOR SCRIPP PIT SITE" and accompanying December 15, 2000 "PIT REMEDIATION AND CLOSURE REPORT", November 2000 "PRELIMINARY SITE INVESTIGATION REPORT, SCRIPP PIT SITE, EDDY COUNTY, NEW MEXICO" and February 28, 2000 "FINAL CLOSURE OF UNLINED SURFACE IMPOUNDMENTS - EDDY COUNTY, NEW MEXICO". These documents contain information on the closure and investigation of the extent of contamination at Yates' Scripp Pit Site located in the NE/4 of the NW/4 of Section 25, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico. The documents also request closure of the site remediation actions.

A review of the information provided shows that ground water underlying the pit is contaminated with benzene and chloride in excess of the New Mexico Water Quality Control Commission (WQCC) standards. Therefore, the OCD cannot issue final closure approval for the site. Pursuant to 19 NMAC 15.A.19.C.1, the OCD requires an abatement plan for the Scripp Pit Site to abate ground water pollution. To initiate the abatement plan process, the OCD requires that Yates submit to the OCD by May 7, 2001 a Stage 1 abatement plan investigation proposal pursuant to OCD Rule 19.E.1. and OCD Rule 19.E.3. If you have any questions, please contact Bill Olson at (505) 827-7154.

Sincerely,

Roger C. Anderson
Environmental Bureau Chief

Ref: Pit Closure for Scripp Pit Site

ENVIRONMENTAL BUREAU
OIL CONSERVATION DIVISION

Dear Mike:

Yates Petroleum Corporation requests closure of the Scripp Unlined Surface Impoundment located in Eddy County New Mexico with no further action required. A brief explanation of the history of our actions at this site follows, and is supplemented with reports from the contractors hired to close the pit. These actions followed OCD guidelines, and included scientific evidence obtained through analytical soil and water testing samples. The narrative explains our risk based analysis and request for closure. These results are contained in the "Preliminary Site Investigation Report" produced by Environmental Technology Group, Inc. (ETGI) and field activity notes and analytical results prepared by Bioremediation Contractors & Consultants, Inc. (BCC).

This Williams Unlined Surface Impoundment site is located in the NE ¼ of the NW ¼ of Section 25, Township 18 S, Range 26 East in Eddy County, New Mexico approximately 9 miles South of Artesia.

In 1997, Yates Petroleum Corporation purchased the H & S Production facilities. These facilities included unlined surface impoundments. As part of the purchase we had an Environmental Assessment done by Harding Lawson Associates (HLA) on this pit. HLA recommended we proceed with closure of this pit. In 1998 we received a bid from BCC to remove liquids, excavate and remediate the contaminated soil via an onsite land farm and to conduct analytical sampling until the pit site was clean enough to pursue closure activities.

Once BCC thought the pit was remediated to proper levels, they sent a closure request dated February 28, 2000 to Donna Williams at the OCD office in Hobbs. When I met with Donna in August 2000, she informed me that the closure report submitted by BCC (see enclosure) was inadequate for three reasons:

Scripp, p. 2

- The soil and water were not sampled for Chlorides
- There was inadequate soil sampling done
- There was no site map or narrative explanation of activities enclosed

In addition to this, BCC inadvertently sent the closure request to the OCD office in Hobbs when in fact the Artesia office had jurisdiction. Once we brought these situations to the attention of Mike Stubblefield, and discussed the deficiencies of the closure request, we contracted ETGI to conduct further analysis of this pit and assist us in our closure.

A complete closure report produced by ETGI is enclosed. Per that report, we drilled bore holes to ground water and sampled for Chlorides, TPH and BTEX, as well as took analytical samples and PID samples on the way down. We completed a site map with sample locations and narrative of all activities.

The results of the soil and water sampling, and an analysis of ground water subsurface flow along with a risk based analysis of the complete situation, lead us to the conclusion that the risk is acceptable and we should proceed with this closure request.

Please review the enclosed materials, and if acceptable grant us our closure request. If you have any questions on this request please do not hesitate to contact me at (505) 748-4223. We would like an approval for this pit closure request by January 26th, 2001.

Sincerely,

David Haggith
Yates Petroleum Corporation
Environmental Coordinator
