RE: Application to Reinstate a Non Standard 120-acre Jalmat Gas Proration Unit
 Wimberly WN #1
 E/2 NW/4 and NW/4 NE/4 of Section 23, T-25S, R-37E, Lea County, New Mexico
 Jalmat (Tansill/Yates/Seven Rivers) Gas Pool

Dear Mr. Stogner / Mr. Sexton:

ARCO Permian respectfully requests administrative approval to reinstate a non-standard 120-acre Jalmat gas proration unit, which consists of the E/2 NW/4 and NW/4 NE/4 of Section 23, T-25S, R-37E, Lea County, New Mexico. ARCO plans to recomplete the Wimberly WN #1, located 1980' FNL and 1980' FWL, to the Jalmat Pool and dedicate it to this proration unit. This 120-acre proration unit was first established by NSP-64 in 1954 and dedicated to this well, the Wimberly WN #1. In 1982, the Wimberly WN #1 was reclassified to the Langlie Mattix Pool. In 1988, the Wimberly WN #1 was deepened and converted to a water disposal well. The location of the Wimberly WN #1 is a standard location for this proration unit.

Attached is a C-102 form identifying the configuration of the subject 120-acre Jalmat gas proration unit. Also attached is a list of offset operators for this unit, and a land plat map of the surrounding area.

ARCO Permian is notifying the offset operators of this application by sending a copy of this application package, along with waiver to objection forms, by certified mail. If you need further information, please call me at (915) 688-5446.

Sincerely,

David K. Newell
