CERTIFIED MAIL

RETURN RECEIPT NO. 7001-1940-0004-3929-7303

Mr. Mark B. Harvey
Williams Field Services
187 County Rd. 4980
Bloomfield, New Mexico 87413

**RE: CASE #3R0340
RANDLEMAN #1 DEHY PIT
SAN JUAN COUNTY, NEW MEXICO**

Dear Mr. Harvey:

The New Mexico Oil Conservation Division (OCD) has completed a review of Williams Field Services' (WFS) February 11, 2002 "RANDLEMAN #1 PIT REMEDIATION AND CLOSURE REPORT". This document contains the results of WFS soil and ground water remediation activities for an unlined pit site in the San Juan Basin at which ground water contamination was discovered. The document requests closure of the site since ground water has been remediated to below New Mexico Water Quality Control Commission (WQCC) standards as demonstrated in 4 consecutive sampling events. The document also proposes to plug and abandon the site ground water monitoring wells.

The pit closure/remediation activities and proposed monitor well plugging and abandonment for the site listed below **are approved on the condition that that the monitor wells are plugged and abandoned by cutting the casing off below ground surface and filling the annulus from bottom to top with a cement grout containing 3-5% bentonite.**

1. Randleman #1 (Dehy pit) Unit K, Sec. 13, T31N, R11W.

Please be advised that OCD approval does not relieve WFS of responsibility if remaining contaminants are found to pose a future threat to surface water, ground water, human health or the environment. In addition, OCD approval does not relieve WFS of responsibility for compliance with any other federal, state, tribal or local laws and regulations.

If you have any questions, please call me at (505) 476-3491.

Sincerely,

A handwritten signature in black ink, appearing to read "W. C. Olson". The signature is fluid and cursive, with the first name "W" being particularly large and stylized.

Albuquerque, NM 87158

**RE: GROUND WATER WELL INSTALLATION WORK PLANS
SAN JUAN BASIN, NEW MEXICO**

Dear Ms. Gannon:

The New Mexico Oil Conservation Division (OCD) has reviewed Public Service Company of New Mexico's (PNM) September 13, 1999 "WELL INSTALLATION PLANS FOR SAN JUAN BASIN GROUNDWATER SITES". This document contains PNM's proposed work plans for installation of additional monitor wells at the Dogie Canyon Compressor Station North and East Pits, Florance #32A well site, Honolulu Line Drip, Jacques #2A well site, Jicarilla Contract 147-6 well site, Mangum #1E well site, McClannahan #22 well site and Randalman #1 well site.

The above referenced monitor well installation work plans are approved. Please be advised that OCD approval does not relieve PNM of liability if the investigations fail to adequately define the extent of contamination related to PNM's activities or if contamination exists which is outside the scope of the work plan. In addition, OCD approval does not relieve PNM of responsibility for compliance with any other federal, state, tribal or local laws and regulations.

If you have any questions, please call me at (505) 827-7154.

Sincerely,

A handwritten signature in black ink, appearing to read "William C. Olson".

RETURN RECEIPT NO. Z-274-520-691

Ms. Kathy Juckes
PNM Gas Services
P.O. Box 4750
Farmington, NM 87499

RE: FINAL SAN JUAN BASIN PIT CLOSURE REPORTS

Dear Ms. Juckes:

The New Mexico Oil Conservation Division (OCD) has reviewed 4 requests for closure of ground water remediation sites which are contained in PNM Gas Services' (PNM) April 29, 1999 "OCD CLOSURE REPORTS - 1ST REPORTING QUARTER 1999". This document requests closure of the sites since ground water has been remediated to below New Mexico Water Quality Control Commission (WQCC) standards as demonstrated in 4 consecutive quarterly sampling events at each site. The document also contains PNM's proposed ground water monitoring well plugging and abandonment procedures.

Below is the OCD's review of these closure requests:

- A. The pit closure/remediation activities and the proposed monitor well plugging and abandonment proposals for the site listed below are **approved**.

1. McClanahan A #2E (Separator pit) Unit O, Sec. 23, T28N, R10W.

Please be advised that OCD approval does not relieve PNM of liability if remaining contaminants are found to pose a future threat to surface water, ground water, human health or the environment. In addition, OCD approval does not relieve PNM of responsibility for compliance with any other federal, state, tribal or local laws and regulations.

- B. The sites listed below which are requested for closure were previously required to have additional ground water monitoring wells installed to determine the extent of ground water contamination that was in excess of WQCC ground water standards. Since the

OCD has no record of this work being completed, the request for closure of these sites is denied. The OCD will reconsider closure of these sites when the required information is submitted.

|----|---------------|-----------------------------|
| 1. | Florance #32A | Unit F, Sec. 15, T30N, R08W |
| 2. | Jacques #2A | Unit D, Sec. 25, T30N, R09W |
| 3. | Mangum #1E | Unit F, Sec. 33, T29N, R11W |

- C. On May 28, 1998, the OCD required that PNM submit plans to install additional ground water monitoring wells to determine the extent of ground water contamination that was in excess of WQCC ground water standards at a number of sites. These plans were to have been submitted to the OCD by July 28, 1999. A review of the case files shows that the OCD does not have any record of receiving these plans. The OCD requires that PNM submit the plans as required in Item A and Item B of the OCD's May 28, 1999 correspondence. The plans shall be submitted to the OCD Santa Fe Office by August 31, 1999 with a copy provided to the OCD Aztec District Office.

If you have any questions, please call me at (505) 827-7154.

Sincerely,

William C. Olson
