RE: Groundwater Impact
BP America Production Company (BP): GCU Com H # 180E Well site - Production Tank Pit
Legal Description: Unit N, Sec. 28, T29N, R12W, San Juan County, New Mexico

Dear Mr. Anderson:

Initial groundwater sample analytical results at the above referenced well site during pit closure activity indicated contamination to be above the State of New Mexico Water Quality Control Commission's regulatory standards for benzene, toluene, and total Xylenes. Sampling of the Production Tank pit was conducted February 17, 2003. Depth to water was estimated at five (5) feet below grade. Listed below is the summary analytical results for Benzene, Toluene, Ethylbenzene, and total Xylenes (BTEX) from the groundwater sample collected within the pit:

Parameter	Separator Pit (II) (parts per billion)
Benzene	280
Toluene	1,100
Ethylbenzene	320
Total Xylenes	910

Telecommunication notification was submitted to Mr. William Olson's voice recorder on March 6, 2003 at approximately 9:45 am. BP will implement its Groundwater Management Plan to address the findings related to this situation.

If you have any questions concerning this information, please do not hesitate to contact us at (505) 632-1199. Thank you for your cooperation.

Respectfully submitted,
Blagg Engineering, Inc.

Nelson Velez
Staff Geologist
