If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* Release was due to corrosion of steel pipeline. The pipeline was exposed and corroded line segment was replaced with poly pipe.

Describe Area Affected and Cleanup Action Taken.\* Impacted soil was excavated from two areas to a maximum depth of 6 feet below grade. The impacted soil was transported to D&D Waste Management. A total of 18 confirmation samples were analyzed for benzene, BTEX, TPH and chlorides. All samples were below the established recommended remediation action levels with the exception of two chloride samples, which exhibited values of 1,240 mg/kg and 1,250 mg/kg. The excavations were backfilled with clean, imported soil. \*Reference: Soil Remediation Report, May 8, 2006

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
