Subject: RE: Km Former Deming Compressor Station Discharge Permit Closure Report

12/10/2020

Cesar Ochoa – Kinder Morgan

RE: Closure Report/KM Former Deming Compressor Station.

The following: On April 15, 2013 the discharge permit GW-147 was discontinued (closed). After review of the closure report dated 09/28/2020, internal data base on work plan approval by the Oil Conservation Division (OCD), it is determined that the site/location closure is APPROVED. This will terminate any activities relative to the previous discharge permit.

Thank you for your time and efforts. Please keep a copy of this communication, as NO paper copy will follow. It may take some time for this to appear in imaged file on OCD online. This has been noted in official OCD Administrative Record data base dated 12/10/2020.

Sincerely,

Bradford Billings

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
