Re: Quarterly Groundwater Monitoring Report Fourth Quarter submitted 10/27/2020

Hello,

Concerning the report indicated above, the following:

1) Post review of offered data, the Oil Conservation Division (OCD) is requesting a more detailed analysis and discussion of data regarding MW-1 and MW-4. Specifically, the C6-C35 hits from the laboratory. OCD realizes the reported values are very low, but as MW-1 is somewhat upgradient of MW-4 it is curious. Does the logged data show any correlation? Please consider this question in the next report.

Thank you for your efforts, and please continue with sampling as per agreement.

Please keep a copy of this communication, as no PAPER copy will follow.

Sincerely,

Bradford Billings
EMNRD/OCD
Albuquerque, NM

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations
