**Subject:** [EXT] Extension Request- PLU 18 Brushy Draw 104H (2RP-5395)

All,

XTO is requesting an extension to the current deadline of October 8, 2019 for submitting a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC at the PLU 18 Brushy Draw 104H (2RP-5395). The release was discovered April 9, 2019. Initial site assessment began May, 6, 2019. However, ongoing frac and flowback activity near the release has delayed further delineation and excavation of impacted soils due to site restrictions for safety concerns. The most recent update provided by the operations team this week stated that flowback operations have completed. Tentative access to the site should be accessible within a couple weeks, and at that time remedial activities will recommence. To provide enough time to fully assess the site and conduct remediation work, XTO requests an extension of the deadline until January 8, 2020.

Thank you,

Kalei Jennings
