Appendix 8: Form C-141 Release Notification

Appendix 9: Form C-141 Site Assessment/Characterization/Remediation Plan

I. Location

Go southeast on Highway 380 from Caprock Store for approximately 3 miles (between MM 205 & MM206) to Button Mesa Road (CR 156). Turn north and go approximately 7 miles to Caliche Pit on the East. Turn east on lease road and go approximately 0.7 miles. Turn left (North) onto the access road to the southeast corner of the pad.

II. Background

EOG Resources, Inc. submitted to the NMOCD District I office a Form C-141, Release Notification for the release of 5 B/PW with 4 B/PW recovered, that occurred on December 6, 2019. The affected area is approximately 10' X 250' on the well pad. The release was caused by a pressure gauge on the wellhead for the tubing that failed, which caused the release. A vacuum truck was called and recovered the remaining oil. A backhoe was dispatched and scraped up the surface of the impacted area, contaminated soils (approximately 60 cubic yards) were disposed at an NMOCD approved facility. The release occurred on the well pad and remained on the well pad

III. Surface and Ground Water

Area surface geology is Eolian deposits. The Mescalero ARL State #2 is located in a Low Karst per Bureau of Land Management Karst Potential KMZ File Google Map Layer (Appendix 2).

Based on information regarding this location (Section 2, T10S-R32E), the United States Geological Survey (USGS) National Water Information System, indicates the depth to groundwater as follows: USGS #332658103385101, (Depth to Water: 53', Field groundwater-level measurements: 1/1996, Distance from Location: 1.42 miles), USGS #332908103364901, (Depth to Water: 80', Field groundwater-level measurements: 4/1971, Distance from Location: 1.78 miles), USGS #33265810339202, (Depth to Water: 80', Field groundwater-level measurements: 11/1991, Distance from Location: 1.81 miles). See Appendix 2.

Watercourses in the area are dry except for infrequent flows in response to major precipitation events, lateral extents of the release are not within a 100-year floodplain and the distance to nearest significant watercourse being approximately 2.95 miles south of the location (Appendix 4).

IV. NMOCD Table I Criteria

Depth to ground water	51-100'
Wellhead Protection Area	> 1000'
Distance to significant watercourse	> 1000'

Depth	Constituent	Method	Limit
51-100'	Chloride	EPA 300.0 or SM4500 Cl B	10,000 mg/kg
	TPH (GRO+DRO+MRO)	EPA SW-846 Method 8015M	2,500 mg/kg
	GRO+DRO	EPA SW-846 Method 8015M	1,000 mg/kg
	BTEX	EPA SW-846 Method 8021B or 8260B	50 mg/kg
	Benzene	EPA SW-846 Method 8021B or 8260B	10 mg/kg

V. Site Delineation Status

Initial sampling was conducted on January 29, 2020, with samples collected being 5 point composite samples at the depth of 1' BSL & GPS coordinates are shown below and results on Appendix 5, (2/26/2020 sidewall samples collected, are also a 5 point composite at the depth of 1' BSL & GPS coordinates are shown below and results on Appendix 5).

- S- 1.1: (33.46975°; -103.63943°) S- 7.1: (33.46995°; -103.63931°) S- 13.1: (33.46989°; -103.63907°)
- S- 2.1: (33.46979°; -103.63941°) S- 8.1: (33.46995°; -103.63927°) S- 14.1: (33.46986°; -103.63904°)
- S- 3.1: (33.46982°; -103.63939°) S- 9.1: (33.46994°; -103.63923°) S- 15.1: (33.46988°; -103.63929°)
- S- 4.1: (33.46985°; -103.63940°) S- 10.1: (33.46993°; -103.63919°) S- 16.1: (33.46986°; -103.63925°)
- S- 5.1: (33.46989°; -103.63936°) S- 11.1: (33.46992°; -103.63915°) S- 17.1: (33.46984°; -103.63921°)
- S- 6.1: (33.46993°; -103.63934°) S- 12.1: (33.46991°; -103.63911°) S- 18.1: (33.46980°; -103.63918°)

SW-1.A.1: (33.46974°; -103.63945°) (33.46986°; -103.63938°) (33.46997°; -103.63934°) (33.46995°; -103.63916°) (33.46988°; -103.63901°)

SW-1.B.1: (33.46975°; -103.63941°) (33.46983°; -103.63937°) (33.46989°; -103.63933°) (33.46986°; -103.63926°) (33.46979°; -103.63918°)

SW-1.C.1: (33.46983°; -103.63917°) (33.46989°; -103.63927°) (33.46993°; -103.63930°) (33.46992°; -103.63918°) (33.46988°; -103.63906°)

These samples were sent to an NMOCD approved laboratory and analysis for the following constituents/methods.

- Chlorides: EPA 300.0
- TPH (GRO+DRO+MRO): Method 8015M
- GRO+DRO: Method 8015M
- BTEX: Method 8015B
- Benzene: Method 8015B

Field Data/Sample Data (Appendix 5).

Laboratory Data and COC (Appendix 6).

VI. Remediation Plan

EOG proposes the following remediation plan.

Based off of the 1/29/2020 and 2/26/2020 enclosed analytical results. EOG will excavate/sample the following areas (S-3.1, S-4.1, S-5.1, S-8.1 & S-9.1), until limits are below Table I Criteria for GRO+DRO levels.

Once levels are meet, EOG will notify the appropriate division district office two business days prior to conducting final sampling. Separate representative wall and base 5-point composite samples will be collected to show horizontal and vertical remediation. Each composite sample must not be representative of more than 200 ft².

If all composite and grab sample concentrations are less than or equal to the parameters listed in Table I, then the responsible party will proceed to backfill the excavated area(s) with approximately 64 cubic yards of clean/like backfill material.

VII. Site Closure

Upon completion of the remedial and backfilling activities, EOG Resources, Inc. will submit a Form C-141/Closure to the NMOCD, including the Closure Report Attachment Checklist.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards.

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/3/2020 at 8:41:33 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

QC Summary Report

Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

Additional Instructions:
 PO# 205632

Field samples, unless otherwise noted, are to be analyzed as received. If a field sample is not analyzed as received, the date and time of collection is given and may be grounds for legal action. Sampled by: _____

Reinquired by: (Signature) _____ Date: 1/30/2019 Time: 7:51 AM

Received by: (Signature) *Ramirez* Date: 1/31/20 Date: _____

Reinquired by: (Signature) _____ Date: _____ Time: _____

Received by: (Signature) _____ Date: _____ Time: _____

Lab Use Only: Received on ice: Y N

AVG Temp °C: T1 _____ T2 4 T3 13

Container Type: Glass, Plastic, Amber Glass, VOA

Note: Samples are discarded 30 days after results are reported unless other arrangements are made. Hazardous samples will be returned to client or disposed of at the client expense. The report for the analysis of the above samples is applicable only to those samples received by the laboratory with this COC. The liability of the laboratory is limited to the amount paid for on the report.

Analytical Report

Report Summary

Client: EOG Resources Inc. - Carlsbad

Samples Received: 2/28/2020

Job Number: 19034-0001

Work Order: P002098

Project Name/Location: Mascalero ARL State #2

Report Reviewed By:

Date: 3/2/20

Walter Hinchman, Laboratory Director

Envirotech Inc. certifies the test results meet all requirements of TNi unless footnoted otherwise.
Statement of Data Authenticity: Envirotech, Inc. attests the data reported has not been altered in any way.
Partial or incomplete reproduction of this report is prohibited, unless approved by Envirotech, Inc.
Envirotech, Inc. holds the Utah TNi certification NM009792018-1 for the data reported.
Envirotech, Inc. holds the Texas TNi certification T104704557-19-2 for the data reported.

QC Summary Report

Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

Release Notification

Responsible Party

Responsible Party EOG Resources, Inc.	OGRID 7377
Contact Name Robert Asher	Contact Telephone 575-748-4217
Contact email bob_asher@eogresources.com	Incident # (assigned by OCD)
Contact mailing address 104 S. 4 th Street, Artesia, New Mexico	

Location of Release Source

Latitude 33.46968 Longitude -103.63948
(NAD 83 in decimal degrees to 5 decimal places)

Site Name: Mescalero ARL State #2	Site Type: Well Pad
Date Release: Discovered 12/6/2019	API# 30-025-37039

Unit Letter	Section	Township	Range	County
O	2	10S	32E	Lea

Surface Owner: State Federal Tribal Private (Name: _____)

Nature and Volume of Release

Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)

<input type="checkbox"/> Crude Oil	Volume Released (bbls)	Volume Recovered (bbls)
<input checked="" type="checkbox"/> Produced Water	Volume Released (bbls) 5	Volume Recovered (bbls) 3
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input type="checkbox"/> Condensate	Volume Released (bbls)	Volume Recovered (bbls)
<input type="checkbox"/> Natural Gas	Volume Released (Mcf)	Volume Recovered (Mcf)
<input type="checkbox"/> Other (describe)	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)

Cause of Release:
Pressure gauge on wellhead for tubing failed causing release of produced water on location.

Was this a major release as defined by 19.15.29.7(A) NMAC? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release?
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)? 	

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

- The source of the release has been stopped.
- The impacted area has been secured to protect human health and the environment.
- Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.
- All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Per 19.15.29.8 B. (f) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Site Assessment/Characterization/Remediation Plan

Incident ID	NRH2003548427
District RP	
Facility ID	
Application ID	

Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	53' (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Did the release impact areas not on an exploration, development, production, or storage site?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

Characterization Report Checklist: *Each of the following items must be included in the report.*

- Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- Field data
- Data table of soil contaminant concentration data
- Depth to water determination
- Determination of water sources and significant watercourses within 1/2-mile of the lateral extents of the release
- Boring or excavation logs
- Photographs including date and GIS information
- Topographic/Aerial maps
- Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

Remediation Plan

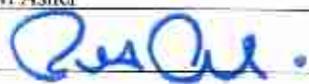

Remediation Plan Checklist: Each of the following items must be included in the plan.

- Detailed description of proposed remediation technique
- Scaled sitemap with GPS coordinates showing delineation points
- Estimated volume of material to be remediated
- Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

Deferral Requests Only: Each of the following items must be confirmed as part of any request for deferral of remediation.

- Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- Extents of contamination must be fully delineated.
- Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
