NMAP1828469051 KING TUT FEDERAL #001H BATTERY @ FMAP1828468531

The OCD has denied the submitted Closure C-141 for incident # NMAP1828469051 for the following reasons:

- Depth to groundwater at this site has not been adequately assessed. When nearby wells are used to determine depth to groundwater, the wells should be no further than ½ mile away from the site, and data should be no more than 25 years old, and well construction information should be provided. If evidence of ground water within a ½ mile radius of the site cannot be provided, the responsible party may choose to remediate to the most stringent levels listed in Table 1 in lieu of drilling to determine the depth to groundwater.
- The site photos were not included with the closure report.
- The analytical data was not included with the closure report.

The Denied C-141 can be found in the online image file. Please review and make the required correction prior to resubmitting through the fee portal. If you have any questions or believe this denial is in error, please contact me prior to submitting an additional C-141.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
