Ashley,

LT Environmental's deferral request for the above release, requests areas impacted by the release, be deferred for remediation until future major well pad construction/alteration or final plugging and abandonment, whichever occurs first. The areas requested for deferral are identified on the site map as pothole soil samples PH08, PH09, PH20 through PH22, and PH22A. Additionally, soil sample FS27 collected from the floor of Excavation Area 1A and excavation soil samples SW22, SW23, SW27, SW28, and SW32 collected from the sidewalls of Excavation Area 2A were requested for deferral. The areas have been delineated and documented in the report. At this time, OCD approves this request. The Final Report C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a State site and will require like approval from SLO.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
