Adrian,

LT Environmental's closure report for the above release, requests areas impacted by the release, be deferred for remediation until future major well pad construction/alteration or final plugging and abandonment, whichever occurs first. The areas requested for deferral are identified on the site map as FS14, FS15, SW06, and SW09 through SW11. The areas have been delineated and documented in the report. At this time, OCD approves this request. The Final Report C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. This is a Federal site and will require like approval from BLM.

Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
