Subject: [EXT] Re: [EXTERNAL] (Final C-141) Tenderloin Federal Com 004H (NAPP2101935216) 01-11-2021
Date: Friday, February 19, 2021 11:42:50 AM

The Closure Report for Tenderloin Federal Com 004H (NAPP2101935216) 01-11-2021 has been approved by BLM as of 02/19/2021.

Site needs like approval from NMOCD.

The BLM acceptance/approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not re-vegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

To Whom it May Concern,

A final inspection has been conducted regarding the clean-up efforts made at the above mentioned lined facility. Free fluids were removed and if present the impacted gravel was removed from the liner and taken to a NMOCD approved disposal facility. The liner was inspected for damage and found to have liner integrity to contain free fluids.

Please see the attached Final C-141 and pictures taken during the final inspection conducted by a Conoco Phillips HSE representative.

Thank you,

Brittany Esparza
