Dear Sir;

Re: Geo L. Harris
McFarland No. 1
NE NE NW - Sec. 2 - 13 N - 35 E
Quay Co.

Answering yours of the 24th. of November will say that the reported Log of the well on the NW.4 of Section 2, 13, 33 is as follows but I have questioned it being that deep.

I accepted this well for a water well.

They were supposed to have struck water at 85 feet	
Sand Gravel and shells to	325 feet
Red bed sticky 325 to	396 feet
Gip rock 396 to	407 feet
Red bed 407 to	415 feet
Red sandy shale 415 to	476 feet
Red bed 476 to	655 feet
Red shale with shells and gip 655 to	710 feet
Brown sandy shale gip and shells 710 to	776 feet

Yours truly,

Sim McFarland
