---

Bradley,

This proposal is approved as written.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

**Subject:** PLU 303

Mike/ Heather/ Jim

Per our meeting on 8-14-14 in regards to the PLU 303, BOPCO plans to excavate to a depth of five feet in sample points one and two, sample point three will be excavated to a depth of six feet to ensure all contamination is removed throughout the release area. Upon completion of excavation and hauling of material, the site will be backfilled with topsoil and closure documentation will be submitted electronically per your request. If you have any questions or concerns please let me know.

Thanks,

Brad Blevins
