Mr. Dade,

This is a written notification to follow up our verbal communications earlier today for SRO State Com #5H (30-015-37425) operated by COG Operating LLC. During a routine pump change, which required pulling the rods and pump it became necessary to pull tubing. At approximately 2:30pm on 7/1/14, while pulling tubing, the well kicked, and the BOP rams were unable to close around the tubing. We currently have a third party well service company on site to address the problem. The location has been secured by blocking the lease road for ¼ mile in both directions. We will be sure to notify you if additional information needs to be provided. Please feel free to contact me if you have questions or concerns.
