Heather/Jim

As per our conversations on Friday 1/23/15 (Jim) & Monday 1/26/15 (Heather), here is the field data that was collected by Diversified Environmental. These are all chloride field samples, we haven't taken the samples to the lab as of yet. At this moment, Diversified is on location and will be removing approximately 2' of material and hauling to Lea Land for disposal. Once the material has been removed, the pad will be rebuilt with a 20 mil liner installed. The remaining impact will be left in place, and will be addressed at reclamation. A C-141 will be submitted shortly, and if there is anything else that we can do feel free to ask. Thanks

Subject: Gissler B 33 battery field sample data and map

Johnny,

Here is the map and field data. Please review and let me know if you want me to take any of these samples to the lab. I would submit the field data as is. The only clean sample we could get was at SP#4. Let me know. Thanks

Mike Burton
