Chase,

The OCD requires all sites to be fully delineated, regardless of DTG. In this case I will accept S2 and S4 as they stand, and will need further delineation at S1 and S3.

If you have any questions or concerns please contact me,

Heather Patterson
Environmental Specialist

Mike and Heather,

Attached is a sketch of the release and the current analytical results that have been collected for the below listed location. I wanted to know if there is enough delineation shown in the current results to proceed to the Work Plan Stage or if further delineation of chlorides is necessary given that DTG is shown as 250' according to the Chevron/Texaco Trend Map?

Carl TB Com. #1
30-015-26138
Section 22, T20S-R24E
1980 FSL & 660 FEL
Eddy County, New Mexico

Released: Unknown amounts of P/W; Recovered: 0 P/W

Thanks,

Chase Settle
