Jacob,

This backfill request is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Burnett Gissler A-2 Battery

All,

Attached is the excavation plat for the Burnett Gissler A-2 Battery. RECS is still hand shoveling the leak area inside the facility, but would like to request permission to install liner in the 4' excavation and begin backfilling all excavations outside of the facility once the leak area inside the facility has been completed and sample results have returned from the lab, RECS will forward you that data and request to backfill at that time. If you have any other questions or concerns please feel free to contact me. Thanks.
