**NATURE OF RELEASE**

Type of Release Produced Water	Volume of Release <b>60bbls</b>	Volume Recovered <b>0bbls</b>
Source of Release Leak on 8" steel transfer line	Date and Hour of Occurrence <b>1/5/2015</b>	Date and Hour of Discovery <b>1/5/2015</b>
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? <b>Mike Bratcher-NMOCD</b>	
By Whom? <b>Kimberly Wilson-Talon/LPE</b>	Date and Hour <b>1/8/2015</b>	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

There was a leak on the 8" trunk line coming from the Indian Basin Station 128 going to the East Indian Basin CTB. The leak caused a release of approximately 60bbls of produced water. Talon/LPE mobilized personnel to conduct an initial site assessment and collect soil samples within the impacted area. Upon receipt of analytical results from the initial soil sampling activities a work plan was drafted and subsequently approved by NMOCD and BLM.

Describe Area Affected and Cleanup Action Taken.\*

The leak was on the transfer line from the Indian Basin Station 128 but was contained to the East Indian Basin CTB location. Fluid from the release point flowed down gradient to a lower location. The lower location had a lined and bermed tank battery. The fluid came off of the hill and entered the lined battery. The fluid also flowed across the lower location for approximately 165-feet and down the lease road to the north for 127-feet. The impacted area was excavated by an Oxy contractor to the parameters laid out in the approved work plan. Once the excavation was complete Talon was contacted to perform confirmation sampling at the location. Results from the confirmation sampling showed that the all of the soil above NMOCD RRAL's was removed. The excavation back backfilled and contoured to match the surrounding location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
