Latitude 32.854395 Longitude -103.939889

NATURE OF RELEASE

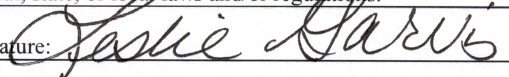

Type of Release Oil	Volume of Release 10 bbls	Volume Recovered 0 bbls
Source of Release Oil Tank	Date and Hour of Occurrence 1/18/14 12:12 pm	Date and Hour of Discovery 1/18/14 12:12 pm
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* The oil tank inside the battery overflowed, releasing 10 barrels of oil. The release moved south through the battery pad, over the lease road and into the pasture over Holly Energy's ROW. The pad was scraped to remove the wet soil. The area in the pasture was covered with soil to help absorb the standing oil and protect livestock/wildlife.

Describe Area Affected and Cleanup Action Taken.* The release affected 22,523 square feet of lease pad and pasture land. RECS personnel were on site beginning on January 29th, 2014. Six points within the release were sampled at the surface and with depth, and representative samples were taken to a commercial laboratory for analyses. Based on the field and laboratory analyses, a CAP was submitted to NMOCD and BLM on March 19th, 2014. BLM approved the CAP on March 20th, 2014, with the stipulation that Burnett had to address the remainder of the contamination at the site during facility abandonment. Based on a discussion with BLM, BLM approved beginning the CAP work on May 12th, 2014. Corrective actions began at the site on May 16th, 2014. A total of 336 cubic yards of caliche was imported to the site. The site was excavated in five portions. The release area in the road was scraped down to 1 ft bgs. A hydro-vac excavated the area outside the tank battery to 1.5 ft bgs. The area within the battery was excavated by hand shovel to a depth of 1.5 ft bgs. The remainder of the lease pad was scraped down to 1 ft bgs. Once these scrapes were completed, a bottom composite from each scrape, except for the road, was taken to a commercial laboratory for analyses. The area in the pasture was excavated to a depth of 3 ft bgs. Once the excavation was completed, wall samples and a 5 point bottom composite sample were taken to a commercial laboratory for analyses. The overspray to the north of the battery was washed with clean water and treated with Micro-Blaze. A total of 564 cubic yards of contaminated soil was taken to a NMOCD approved facility for disposal. A total of 268 cubic yards of top soil was imported to the site to serve as backfill in the pasture area. Point 7 and Point 8 were sampled at the surface to determine if contaminated soil existed in these areas. The samples were taken to a commercial laboratory, which confirmed constituent values at or near non-detectable levels. On October 20th, 2014, a request was sent to NMOCD and BLM to backfill the site. NMOCD approved the site to be backfilled on October 21st, 2014. The lease pad and battery were backfilled with the imported caliche, and the pasture was backfilled with the imported top soil. On November 14th, 2014, soil amendments were added to the pasture area, and this area was seeded with LPC mix.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
