Thank you for the analytical data, it looks great. I also need to know what depth the actual excavation was for this area.

Good morning Heather. I've attached the lab data from Cardinal, showing we achieved a depth to 9 ft. I apologize for failing to include it in my Closure Request.

Thanks and have a great day.

Michelle,

I'm working on the Honey Graham 29 6H and was wondering what depths you reached in the area of AH-2? Also, was this further delineated? I wouldn't require it, but if it was trenched I'd like to see those numbers.

Thank you,

Heather Patterson
