Remedial Activities and Closure Report

Lime Rock Resources II-A, L.P.

Logan 35 Tank Battery 30-015-30409 (2RP-3083)

408 West Texas Ave. Artesia, New Mexico 88210 Phone 575,746,8768 Fax 575.746.8905

Dear Mr. Bratcher,

HORRS 318 East Taylor Street Hobbs, New Mexico 88240

Phone 575.393.4261 Fax 575.393.4658

Lime Rock Resources II-A, L.P. (Lime Rock) has contracted Talon/LPE (Talon) to perform soil assessment and remediation services at the above referenced location. The incident description, soil sampling results, and deferment request are submitted herein.

Background Information

MIDLAND 2901 State Hwy 349 Midland, Texas 79706

Phone 432.522.2133

The Logan 35 Tank Battery is located approximately twelve miles southeast of Artesia, New Mexico. The legal location for this release is Unit Letter O, Section 35, Fax 432.522.2180 Township 17 South and Range 27 East. More specifically the latitude and longitude for this release are 32.78660977 North and -104.2476784 West. A site plan is presented in Appendix I.

OKLAHOMA CITY 7700 North Hudson Avenue Suite 10 Oklahoma City, Oklahoma 73116 Phone 405.486.7030

> SAN ANTONIO 13111 Lookout Way San Antonio, Texas 78233 Phone 210.265.8025 Fax 210.568.2191

According to the soil survey provided by the United States Department of Agriculture Natural Resources Conservation Service, the soil in this area is made up of the Fax 806.467.0622 Gypsum land-Cottonwood complex with 0 to 3 percent slopes. Per the New Mexico Bureau of Geology and Mineral Resources, the local surface and shallow geology is comprised of older alluvial deposits of upland plains and piedmont areas. Drainage courses in this area are normally dry. Groundwater in the project vicinity is approximately 100-feet below ground surface (bgs) according to the 2006 Chevron Texaco Groundwater Trend Map. See Appendix II for the referenced groundwater data.

The ranking for this site is **0** Based on the following:

Depth to ground water >100' Wellhead Protection Area >1000° Distance to surface water body >1000°

Incident Description

The number 2 transfer pump failed resulting in a release of approximately 805bbls of produced water and 15bbls of oil. Upon discovery of the release vacuum trucks were immediately dispatched to the location and were able to recover approximately 780bbls of mixed fluids from the battery and location.

Equipment and personnel were mobilized to begin conducting remedial activities on the location and within the battery. The saturated material was scraped off of the surface of the location. Hydro-excavation and hand digging began in the battery to remove the saturated material to a depth of approximately 1-foot bgs or to the point to where excavation was no longer feasible due to concerns over the structural integrity of the tanks.

Talon mobilized personnel to conduct an initial site assessment and to perform soil sampling within the impacted area. Analytical results from the soil sampling activities are summarized in the table below.

Laboratory Results

See Appendix III for complete report of laboratory results.

Sample ID	Depth (feet)	BTEX (mg/kg)	Chlorides (mg/kg)	TPH (mg/kg) GRO	TPH (mg/kg) DRO

(--) Analyte Not Tested

(ND) Analyte Not Detected

Based upon the site ranking of **0**, NMOCD Recommended Remedial Action Levels (RRAL) are 50 mg/kg for BTEX, 10 mg/kg for Benzene, and 5,000 mg/kg for TPH.

Remedial Actions and Deferment Request

- The impacted area within the battery was excavated to a depth of 1-foot bgs. Care was taken to insure the structural integrity of the tanks was not jeopardized.
- The impacted area on location was excavated to a depth of 0.5-feet bgs.
- All of the excavated material was hauled to an NMOCD approved solid waste disposal facility.
- The excavation was backfilled with caliche and contoured to match the surrounding location.
- As stated in the NMOCD & BLM approved work plan the remaining chloride impacts at this site will be remediated at the closure of the facility.

Deferment

On behalf of Lime Rock Resources, we respectfully request that no further actions be required at this time and that any further remediation of this site be deferred to the close of the facility.

If we can provide additional information or be of further assistance, please contact our office at (575)-746-8768.

Respectfully submitted,

TALON/LPE

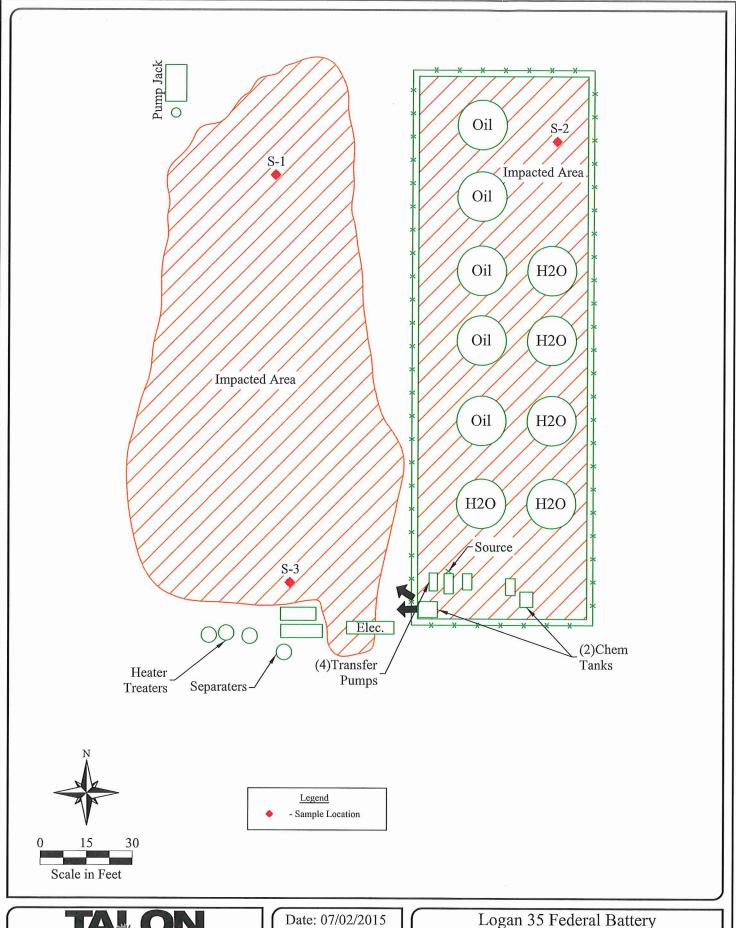

Sheldon L. Hitchcock

LABORATORY RESULTS

July 01, 2015

DAVID ADKINS

TALON LPE

408 W. TEXAS AVE.

ARTESIA, NM 88210

RE: LOGAN 35 BATTERY

Enclosed are the results of analyses for samples received by the laboratory on 06/30/15 13:10.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.qov/field/qa/lab accredited analytes and matrices visit the TCEQ website at www.tceq.texas.qov/field/qa/lab accredited certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2

Haloacetic Acids (HAA-5)

Method EPA 524.2

Total Trihalomethanes (TTHM)

Method EPA 524.4

Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

Celey D. Keene

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

ARTESIA, NM 88210

RE: LOGAN 35 BATTERY

Enclosed are the results of analyses for samples received by the laboratory on 07/01/15 13:43.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab accred certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2

Haloacetic Acids (HAA-5)

Method EPA 524.2

Total Trihalomethanes (TTHM)

Method EPA 524.4

Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

Celey D. Keine

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene
