RE: BopCo * PLU 213 SWD * 30-015-33859 * 2RP-1202

Tony,

This closure report is approved.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mike, Heather

To refresh your memory, this is one of the open sites at the PLU-213 SWD location that we discussed in April of this year. This is the site listed as "purple" on the original spill issues map for the area. Upon your recommendation I have split the aerial map up and will address each site individually associated with the RP #

I am working on the other closures and should have the rest of these completed this week.

Thanks for your patience.

Regards

Tony
