Form C-141  
Revised August 8, 2011

Submit 1 Copy to appropriate District Office in  
accordance with 19.15.29 NMAC.

**Release Notification and Corrective Action**

**OPERATOR**

☒ Initial Report ☐ Final Report

Name of Company	DCP Midstream	Contact	Nick Case
Address	5301 Sierra Vista Dr	Telephone No.	575-802-5225
Facility Name	20200 line	Pipeline	
Surface Owner	BLM,	Mineral Owner	unknown
		API No.	

**LOCATION OF RELEASE**

Unit Letter	Section 26	Township 23S	Range 31E	Feet from the	North/South Line	Feet from the	East/West Line	County	Eddy
-------------	---------------	-----------------	--------------	---------------	------------------	---------------	----------------	--------	------

Latitude 32.280692 Longitude -103.743890

**NATURE OF RELEASE**

Type of Release	Pipeline Release	Volume of Release	6BBL	Volume Recovered	0 BBL
Source of Release	Liquids Pipeline (circle one)	Date and Hour of Occurrence	Unknown	Date and Hour of Discovery	09/23/15
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Randy Dade by phone message @ 14:31 to 575-626-1372			
By Whom?	Nick Case	Date and Hour			
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N / A			

If a Watercourse was Impacted, Describe Fully.\* N / A

Describe Cause of Problem and Remedial Action Taken.\*

Gathering pipeline leak.

Describe Area Affected and Cleanup Action Taken.\*

1/3 of an acre of soil and shrubbery affected.  
Cleanup plan: See Attachment

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

### **Release Cleanup Plan**

DCP will determine the lateral and vertical extent of the contamination (hand augering and trenching). Once this has been determined all visible contaminated soil will be excavated and transported to a NMOCD solid waste disposal facility. During excavation contaminated soil will be put on plastic awaiting disposal.

Confirmation samples will be collected and analyzed for BTEX and TPH. The values must be below BTEX and TPH cleanup criteria prescribed in *Guidelines for Remediation of Leaks, Spills, and Releases* (1993) authored by the New Mexico Oil Conservation Division and is a function of groundwater depth and distance to water wells and surface water bodies. If sample analyses show levels above cleanup criteria re-excavation and resampling will be performed.

After closure is approved the area will be backfilled to grade with clean soil and seeded with BLM approved seed. Microblaze will be applied to areas with impacts less than one inch in depth. A closure report will be prepared for BLM review and will include a narrative of cleanup activities, analyticals, and a diagram of impacted area.
