Mike

Here is the report from Cardinal Labs. Our construction crew would like to replace 1300 ft. of pipe on our ROW to avoid any further issues with the line. We have removed the affected soil and would like to continue with the replacement of the pipe to the leak area.

Samples were taken at the depths below.

Sample #1 East Side Wall was done at 5 ft.
Sample #2 under pipe 10-11 ft.
Sample #3 West side wall 7-8 ft.
