If a Watercourse was Impacted, Describe Fully.\*: n/a

Describe Cause of Problem and Remedial Action Taken.\*: A valve upstream from the circulating pump washed out and wouldn't hold fluid back. The spill filled up the berm around the circ. pump and overflowed it.

Describe Area Affected and Cleanup Action Taken.\* : Impacted area around transfer pump inside containment; containment overflowed and fluid ran down lease road approx. 220 ft, through the pasture approx 100 ft, and down the bar ditch of the county road approx. 80 ft. Vacuumed up all free standing fluid. Site was excavated and soils were treated per OCD and BLM requirements in approved CAP.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
