RE: Memorial Production Operating * NSLU #197 * 30-015-33065 * 2RP-3381

Tim,

Your CAP for the above referenced site is approved with the following conditions:

- Excavate AH 1 to 6" and haul off;
- Excavate AH 4 to 1' and haul off;
- Like approval by BLM is required for all Federal sites.

Your use of DeSalt to treat chloride impacted soils is approved. The OCD accepts that the TPH hit at AH 1 (4-5') is probably an outlier.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
