---

Austin,

I have a couple of quick questions about this. What is your proposed excavation depth for the pad, I don't see a specific depth mentioned. Do you have any sample data from D1 or D2 or from the south end of the pad? Also, you reference "NMOCD Division 1 Standards". Can you please explain what is meant by division 1 standards?

Thanks,

Heather Patterson

Please review, this is for the pad and surrounding pasture only. SMA is going to try to access the remainder of the draw via ATV on Wednesday to gain a complete picture of the affected area and potential remedial pathways.

Thanks
