RE: Vanguard * Candelario 24 #1 SWD * 30-015-26536 * **2RP-2400**

Kyle,

The dirt work portion of your CAP is approved as written. The proposed monitoring well location has been reviewed by our hydrologist in Santa Fe and he requested this well be situated as close to the excavation as practical, on the probable down gradient side. In the event of chloride impact, more delineation wells will be necessary.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson
