RE: Linn Operating * JL Keel A #11 * 30-015-05099 * 2RP-2276 * Date of Release 4/14/2014

The OCD concurs with BLM approval and COAs for this work plan. In the future the OCD will expect a full delineation at all sites and "refusals" at shallow depths will not be accepted. Please note, this work plan was sent to the OCD by the BLM, not by Linn.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

FYI....

Michael,

BLM has reviewed and accepts/approves your work plan as written. BLM requests you use a 20mil liner on SP2 since you were unable to fully delineate SP2. You will need to obtain like concurrence with the NMOCD.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
