Mike,

Here are the documents that we reviewed in the office several days ago. As we discussed, my plan is to remove the dirt berm from around the tank and excavate the pad underneath it to a depth of 1'-2'. While I have the equipment on site I'll attempt to collect deeper samples than I was able to collect manually, and delineate the soil to 250ppm Cl-. The excavated material will be disposed of at the Lealand disposal site, and clean pad material will be used to backfill upon your approval. If Agave decides to put this location back into service we will construct a new, lined containment to hold the tank.

Please let me know if there are any questions or concerns regarding this work.

Thanks,
Kerry Egan

Mike,

Here is the documentation for the Dark Canyon release that we discussed yesterday. Please review and let me know if you have any questions.

As soon as I have the sampling results I will pass them along to you.

Thanks,

Kerry Egan
