RE: Chevron USA \* Lotos C Federal 907 \* 30-015-34945 \* **2RP-3644** \* DOR: 3/20/16

Daniel,

Based on data presented, your proposal to backfill the excavation associated with the above referenced release is approved. Federal sites will require like approval from BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, please contact me.

**Subject:** Lotos C Federal #907

Mr. Bratcher,

Attached for your review are the Sample Map and Analytical Table for the Lotos C Federal #907, 2RP 3644, operated by Chevron. Based on laboratory analytical results we are proposing backfilling the site. The excavation is approximately 12" deep.

With NMOCD approval the site will be backfilled with clean soil and a Final Closure Report will be submitted.
