All,

Attached please find our proposed remediation plan for the above referenced project. We're proposing on-site remediation using a soil shredder with spray applications of hydrogen peroxide along with confirmation sample analysis. We have several of these working successfully in Texas and the technology is approved by the TXRRC and TCEQ. A link to a YouTube video is provided below. Please right click on the link and then select open hyperlink to see a soil shredder at work.

<https://www.youtube.com/watch?v=fbR4gxM9a5o>

Let us know if you have any questions. We are respectfully requesting permission to use this technology and we hope that you would be able to visit the project once the process is underway.

Thank you.
